SCHEDULE 1

CUSTOMS, EXCISE AND SALES DUTIES AND SURCHARGE

GENERAL NOTES

A. GENERAL RULES FOR THE INTERPRETATION OF THIS SCHEDULE

Classification of goods in this Schedule shall be governed by the following principles:

1. The titles of Section, Chapters and sub-Chapters are provided for ease of reference only; for legal purposes, classification shall be determined according to the terms of the headings and any relative Section or Chapter Notes and, provided such headings or Notes do not otherwise require, according to the following provisions:

2.

(a) Any reference in a heading to an article shall be taken to include a reference to that article incomplete or unfinished, provided, as presented, the incomplete or unfinished article has the essential character of the complete or finished article. It shall also be taken to include a reference to that article complete or finished (or falling to be classified as complete or finished by virtue of this Rule), unassembled or disassembled.

(b) Any reference in a heading to a material or substance shall be taken to include a reference to mixtures or combinations of that material or substance with other materials or substances. Any reference to goods of a given material or substance shall be taken to include a reference to goods consisting wholly or partly of such material or substance. The classification of goods consisting of more than one material or substance shall be according to the principles of Rule 3.

3. When by application of Rule 2(b) or for any other reason, goods are, prima facie, classifiable under two or more headings, classification shall be effected as follows:

(a) he heading which provides the most specific description shall be preferred to headings providing a more general description. However, when two or more headings each refer to part only of the materials or substances contained in mixed or composite goods or to part only of the items in a set put up for retail sale, those headings are to be regarded as equally specific in relation to those goods, even if one of them gives a more complete or precise description of the goods.

(b) Mixtures, composite goods consisting of different materials or made up of different components, and goods put up in sets for retail sale, which cannot be classified by reference to 3(a), shall be classified as if they consisted of the material or component which gives them their essential character, insofar as this criterion is applicable.

(c) When goods cannot be classified by reference to 3(a) or 3(b), they shall be classified under the heading which occurs last in numerical order among those which equally merit consideration.

4. Goods which cannot be classified in accordance with the above Rules shall be classified under the heading appropriate to the goods to which they are most akin.

5. In addition to the foregoing provisions, the following Rules shall apply in respect of the goods referred to therein:

(a) Camera cases, musical instrument cases, gun cases, drawing instrument cases, necklace cases and similar containers, specially shaped or fitted to contain a specific article or set of articles, suitable for long-term use and presented with the articles for which they are intended, shall be classified with such articles when of a kind normally sold therewith. This Rule does not, however, apply to containers which give the whole its essential character;

(b) Subject to the provisions of Rule 5(a) above, packing materials and packing containers presented with the goods therein shall be classified with the goods if they are of a kind normally used for packing such goods. However, this provision is not binding when such packing materials or packing containers are clearly suitable for repetitive use.

6. For legal purposes, the classification of goods in the subheadings of a heading shall be determined according to the terms of those subheadings and any related subheading Notes and, mutatis mutandis, to the above Rules, on the understanding that only subheadings at the same level are comparable. For the purposes of this Rule the relative Section and Chapter Notes also apply, unless the context otherwise requires.

3. When a rate of duty in respect of any goods consists of two or more parts separated by the word "or", each such part shall be deemed to be a separate and complete rate of duty and such rate of duty yielding the higher or highest amount of duty shall be applicable in respect of such goods.

4. A rate of duty applicable under any heading or tariff item to any unit of mass, measure, quantity or any other characteristic shall, unless otherwise provided in such heading or tariff item, apply proportionately to any part of such unit.

   (b) products obtained in the Community incorporating materials which have not been wholly obtained there, provided that such materials have undergone sufficient working or processing in the Community within the meaning of Article 5 of this Protocol.

It shall not be necessary that such materials have undergone sufficient working or processing, provided they have undergone working or processing going beyond that referred to in Article 6 of this Protocol.

2. Materials originating in South Africa shall be considered as materials originating in the Community when incorporated into a product obtained there. In the allocation of origin, no account shall be taken of materials originating in the ACP States which have undergone sufficient working or processing in the Community or South Africa.

The documents referred to in Articles 15(3) and 19(3) used for the purpose of proving that products covered by an EUR. 1 movement certificate or an invoice declaration can be considered as products originating in the Community, in South Africa , or in one of the other countries referred to in Article 3 and fulfil the other requirements of this Protocol may consist, INTER ALIA, of the following:

(a) direct evidence of the process carried out by the exporter or supplier to obtain the goods concerned, contained for example in his accounts or internal bookkeeping;
(b) documents proving the originating status of materials used, issued or made out in the Community, South Africa or in one of the other countries referred to in Article 3, where these documents are used in accordance with domestic law;
(c) documents proving the working the working or processing of materials in the Community or South Africa, issued or made out in the Community or South Africa, where these documents are used in accordance with domestic law;
(d) EUR. 1 movement certificates or invoice declarations proving the originating status of materials used, issued or made out in the Community or South Africa in accordance with this Protocol, or in one of the other countries referred to in Article 3, in accordance with that Article;
(e) suppliers' declarations proving the working or processing undergone in SACU of materials used, in accordance with Article 3.

Article 27

Preservation of proof of origin, suppliers' declarations and supporting documents

1. The exporter applying for the issue of an EUR. 1 movement certificate shall keep for at least three years the documents referred to in Article 15(3).

2. The exporter making out an invoice declaration shall keep for at least three years a copy of this invoice declaration as well as the documents referred to in Article 19(3).
3. The supplier making out a suppliers' declaration shall keep for at least three years copies of the declaration and of the invoice, delivery note or other commercial document to which this declaration is annexed as well as all approriate documents proving that the information given on this declaration is correct.
4. The customs authorities of the exporting country issuing an EUR. 1 movement certificate shall keep for at least three years the application form referred to in Article 15(2).
5. The customs authorities of the importing country shall keep for at least three years the EUR. 1 movement certificates and the invoice declarations submitted to them.

Article 28

Discrepancies and formal errors

1. The discovery of slight discrepancies between the statements made in the proof of origin and those made in the documents submitted to the customs office for the purpose of carrying out the formalities for importing the the products shall not, IPSO FACTO, render the proof of origin null and void if it is duly established that the document does correspond to the product submitted.
2. Obvious formal errors such as typing errors on a proof of origin should not cause this document to be rejected if these errors are not such as to create doubts concerning the correctness of the statements made in the document.

Article 29

Amounts expressed in euro

1. Amounts in the national currency of the exporting country equivalent to the amounts expressed in euro shall be fixed by the exporting country and communicated to the importing countries through the EuropeanCommission.
2. When the amounts exceed the corresponding amounts fixed by the importing country, the latter shall accept them if the products are invoiced in the currency of the exporting country. When the products are invoiced in the currency of another EC Member State, the importing country shall recognise the amount notified by the country concerned.
3. The amounts to be used in any given national currency shall be equivilant in that national currency of the amounts expressed in euro as at the first working day in October 1999.
4. The amounts expressed in euro and their equivalents in the national currencies of the EC Member States and South Africa shall be reviewed by the Co-operation Council at the request of the Community or South Africa. When carrying out this review, the Co-opereation Council shall ensure that there will be no decrease in the amounts to be used in any national currency and shall furthermore consider the desirability of preserving the effects of the limits concerned in real terms. For this purpose, it may decide to modify the amounts expressed in euro.

TITLE V

ARRANGEMENTS FOR ADMINISTRATIVE CO-OPERATION

Article 30

Mutual assistance

1. The customs authorities of the EC Member States and of South Africa shall provide each other, through the European Commission, with specimen impressions of stamps used in their customs offices for the issue of EUR.1 movement certificates and with the addresses of the customs authorities responsible for verifying those certificates and invoice declarations.
2. In order order to ensure the proper application of tis Protocol, the Community and South africa Shall assist each other, through the competent customs administrations, in checking the authenticity of the EUR. 1 movement certificates or the invoice declarations and the correctness of the information given in these documents.

Article 31

Verification of proofs of origin

1. Subsequent verifications of proofs of origin shall be carried out at random or whenever the customs authorities of the importing country have reasonable doubts as to the authenticity of such documents, the originating status of the products concerned or the fulfilment of the other requirements of this Protocol.
2. For the purposes of implementing the provisions of paragraph 1, the customs authorities of the importing country shall return the EUR.1 movement certificate and the invoice, if it has been submitted, the invoice declaration, or a copy of these documents, to the customs authorities of the exporting country giving, where appropriate, the reasons for the enquiry. Any documents and information obtained suggesting that the information given on the proof of origin is incorrect shall be forwarded in support of the request for verification.
3. The verification shall be carried out by the customs authorities of the exporting country. For this purpose, they shall have the right to call for any evidence and to carry out any inspection of the importer's accounts or any other check considered appropriate.
4. If the customs authorities of the importing country decide to suspend the granting of preferential treatment to the products concerned while awaitng the results of the verification, release of the products shall be offered to the importer subject to any precautionary measures judged necessary.
5. The customs authorities requesting the verification shall be informed of the results of the verification as soon as possible. These results must indicate clearly whether the documents are authentic and whether the products concerned can be considered as products originating in the Community or in South Africa and fulfil the other requirements of this Protocol.
6. If in cases of reasonable doubt there is no reply within 10 months of the date of the verification request or if the reply does not contain sufficient information to determine the authenticity of the document in question or the real origin of the products, the requesting customs authorities shall, except in exceptional circumstances, refuse entitlement to the preferences.

Article 32

Dispute settlement

1. Where disputes arise in relation to the verification procedures of Article 31 which cannot be settled between the customs authorities responsible for carrying out this verification or where they raise a question as to the interpretation of this Protocol, they shall be submitted to the Co-operation Council.
2. In all cases the settlement of disputes between the importer and the customs authorities of the importing country shall be under the legislation of the said country.

Article 33

Penalties

Penalties shall be imposed on any person who draws up, or causes to be drawn up, a document which contains incorrect information for the purpose of obtaining a preferential treatment for products.

Article 34

Free zones

1. The Community and South Africa shall take all necessary steps to ensure that products traded under cover of a proof of origin which in the course of transport use a free zone situated in their territory, are not substituted by other goods and do not undergo handling other than normal operations designed to prevent their deterioration.
2. By means of an exemption to the provisions contained in paragraph 1, when products originating in the Community or South Africa are imported into a free zone under cover of a proof of origin and undergo treatment or processing, the authorities concerned shall issue a new EUR. 1 certificate at the exporter's request, if the treatment or processing undergone is in conformity with the provisions of this Protocol.

TITLE VI

Article 35

1. The term "Community" used in Article 2 does not cover Ceuta and Melilla.

2. Products originating in South Africa, when imported into Ceuta or Melilla, shall enjoy in all respects the same customs regime as that which is applied to products originating in the customs territory of the Community under Protocol 2 of the Act of Accession of the Kingdom of Spain and the Portuguese Republic to the European Communities. South Africa shall grant to imports of products covered by the Agreement and originating in Ceuta and Melilla the same customs regime as that which is granted to products imported from and originating in the Community.

3. For the purpose of the application of paragraph 2 concerning products originating in Ceuta and Mellilla, this Protocol shall apply, MUTATIS MUTANDIS, subject to the special conditions set out in Article 36.

(ii) those products originate in Ceuta and Melilla or the Community within the meaning of this Protocol, provided that they have been submitted to working or processing which goes beyond the insufficient working or processing referred to in Article 6(1).

2. Ceuta and Melilla shall be considered as a single territory.

3. The exporter or his authorised representative shall enter "South Africa" and "Ceuta and Melilla" in Box 2 of EUR.1 movement certificates or on invoice declarations. In addition, in the case of products originating in Ceuta and Melilla, this shall be indicated in box 4 of EUR. 1 movement certificates or on invoice declarations.

4. The Spanish customs authorities shall be responsible for the application of this Protocol in Ceuta and Melilla.

Article 38

Implementation of the Protocol

The Community and South Africa shall each take the steps necessary to implement this Protocol.

Article 39

Goods in transit or storage

The provisions of the Agreement may be applied to goods which comply with the provisions of this Protocol and which on the date of entry into force of the Agreement are either in transit or are in the Community or in South Africa or, in temporary storage in bonded warehouses or in free zones, subject to the submission to the customs authorities of the importing state, within four months of that date, of an EUR. 1 certificate endorsed retrospectively by the competent authorities of the exporting state together with the documents showing that the goods have been transported directly.

ANNEX 1

INTRODUCTORY NOTES TO THE LIST IN ANNEX II

Note 1:

Note 2:

2.1. The first two columns in the list describe the product obtained. The first column gives the heading number or chapter number used in the Harmonised System and the second column gives the description of goods used in that system for that heading or chapter. For each entry in the first two columns a rule is specified in column 3 or 4. Where, in some cases, the entry in the first column is preceded by an "ex", this signifies that the rules in columns 3 or 4 apply only to the part of that heading as decribed in column 2.

2.2. Where several heading numbers are grouped together in column 1 or a chapter number is given and the description of products in column 2 is therefore given in general terms, the adjacent rules in colums 3 or 4 apply to all products which, under the Harmonised System, are classified in headings of the chapter or in any of the headings grouped together in column 1.

2.3. Where there are different rules in the list applying to different products within a heading, each indent contains the description of that part of the heading covered by the adjacent rules in column 3 or 4.

2.4. Where, for an entry in the first two columns, a rule is specified in both columns 3 and 4, the exporter may opt, as an alternative, to apply either the rule set out in column 3 or that set out in column 4. If no origin rule is given in column 4, the rule set out in column 3 has to be applied.

Note 3:

3.1. The provisions of Article 5 of the Protocol concerning products having aquired originating status which are used in the manufacture of other products apply regardless of whether this status has been aquired inside the factory where these products are used or in another factory in the Community or in South Africa.

Example:

An engine of heading 84.07, for which the rule states that the value of the non-originating materials which may be incorporated may not exceed 40% of the ex-works price, is made from "other alloy steel roughly shaped by forging" of heading ex 72.24.

If this forging has been forged in the Community from a non-originating ingot, it has already acquired originating status by vitue of the rule for heading ex 72.24 in the list. The forging can then count as originating in the value calculation for the engine regardless of whether it was produced in the same factory or in another factory in the Community. The value of the non-orignating ingot is thus nat taken into account when adding up the value of the non-originating materials used.

3.2. The rule in the list represents the minimum amount of working or processing required and the carrying out of more working or processing also confers originating status. Thus if a rule provides that non-originating material at a certain level of manufacture may be used, the use of such material at an earlier stage of manufacture is allowed and the use of such material at a later stage is not.

3.3. Without prejudice to Note 3.2 where a rule states that "materials of any heading" may be used, materials of the same heading as the product may also be used, subject, however, to any specific limitations which may also be contained in the rule. However, the expression "manufacture from materials of any heading, including other materials of heading....." means that only materials classified in the same heading as the product of a different description than that of the product given in column 2 of the list may be used.

3.4. When a rule in the list specifies that a product may be manufactured from more than one material, this means that any one or more materials may be used. It does not require that all be used.
Example:

The rule for fabrics of heading 52.08 to 52.12 provides that natural fibres may be used and that chemical materials, among other materials, may also be used. This does not mean that both have to be used; it is possible to use one or the other or both.

3.5 Where a rule in the list specifies that a product must be manufactured from a particular material, the condition obviously does not prevent the use of other materials which, because of their inherent nature, cannot satisfy the rule. (See also Note 6.2 below in relation to textiles).
Example:

The rule for prepared foods of heading 19.04 which specifically excludes the use of cereals and their derivatives does not prevent the use of mineral salts, chemicals and other additives which are not products from cereals.
However, this does not apply to products which, although they cannot be manufactured from the particular materials specified in the list, can be produced from a material of the same nature at an earlier stage of manufacture.
Example

In the case of an article of apparel of ex Chapter 62 made from non-woven materials, if the use of only non-originating yarn is allowed for this class of article, it is not possible to start from non-woven cloth, even if non-woven cloths cannot normally be made from yarn. In such cases, the starting material would normally be at the stage before yarn, that is the fibre stage.

3.6 Where, in a rule in the list, two percentages are given for the maximum value of non-originating materials that can be used, than these percentages may not be added together. In other words, the maximum value of all the non-originating materials used may never exceed the highest of the percentages given. Furthermore, the idividual percentages must not be exceeded in relation to the particular materials they apply to.

Note 4:

4.1. The term "natural fibres" is used in the list to refer to fibres other than artificial or synthetic fibres. It is restricted to the stages before spinning takes place, including waste, and, unless otherwise specified, includes fibres that have been carded, combed or otherwise processed but not spun.

4.2 The term "natural fibres" include horse hair of heading 05.03, silk of headings 50.02 and 50.03 as well as the wool fibres, fine or coarse animal hair of headings 51.01 to 51.05, the cotton fibres of headings 52.01 to 52.03 and the other vegetable fibres of headings 53.01 to 53.05.

4.3. The terms "textile pulp", "chemical materials" and "paper-making materials" are used in the list to describe the materials not classified in Chapters 50 to 63, which can be used to manufacture artificial, synthetic or paper fibres or yarns.

4.4. The term "man-made staple fibres" is used in the list to refer to synthetic or artificial filament tow, staple fibres or waste, of headings 55.01 to 55.07.

Note 5:

5.1. Where for a given product in the list a reference is made to this note, the conditions set out in column 3 shall not be applied to any basic textile materials, used in the manufacture of this product, which, taken together, represent 10% or less of the total weight of all the basic textile materials used. (See also Notes 5.3 and 5.4)

5.2. However, the tolerance mentioned in Note 5.1 may only be applied to mixed products which have been made from two or more basic textile materials.

The following are the basic textile materials:

- silk;

- wool;

- coarse animal hair;

- fine animal hair;

- horse hair;

- cotton;

- paper-making materials and paper;

- flax;

-true hemp;

- jute and other textile bast fibres;

- sisal and other textile fibres of the genus Agave;

- coconut, abaca, ramie and other vegetable textile fibres;

- synthetic man-made filaments;

- artificial man-made filaments;

- synthetic man-made staple fibres of polypropylene;

- synthetic man-made staple fibres of polyester;

- synthetic man-made staple fibres of polyamide;

- synthetic man-made staple fibres of polyacrylonitrile;

- synthetic man-made dtaple fibres of polyimide;

- synthetic man-made staple fibres of polytetrafluoroethylene;

- synthetic man-made staple fibres of polyphenylene sulphide;

- synthetic man-made staple fibres of ployvinyl chloride;

- other synthetic man-made staple fibres;

- artificial man-made staple fibres of viscose;

- other artificial man-made staple fibres;

- yarn made of polyurethane segmented with flexible segments of polyether whether or not gimped;

- yarn made of polyurethane segmented with flexible segments of polyester whether or not gimped;

- products of heading 56.05 (metalised yarn) incorporating strip consisting of a core of aluminium foil or of a core of plastic film whether or not coated with aluminium powder, of a width not exceeding 5 mm, sandwiched by means of a transparent or coloured adhesive between two layers of plastic film;
- other products of heading 56.05

Example:

A yarn of heading 52.05 made from cotton fibres of heading 52.03 and synthetic staple fibres of heading 55.06 is a mixed yarn. Therefore, non-originating synthetic staple fibres that do not satisfy the origin rules (which require manufacture from chemical matarials or textile pulp) may be used up to a weight of 10% of the yarn.

Example:

A woollen fabric of heading 51.12 made from woollen yarn of heading 51.07 and synthetic yarn of staple fibres of heading 55.09 is a mixed fabric. Therefore synthetic yarn which does not satisfy the origin rules (which require manufacture from chemical materials or textile pulp) or woollen yarn that does not satisfy the origin rules (which require manufacture from natural fibres, not carded or combed or otherwise prepared for spinning) or a combination of the two may be used provided their total weight does not exceed 10% of the weight fabric.
Example:

Tufted textile fabric of heading 58.02 made from cotton yarn of heading 52.05 and cotton fabric of heading 52.10 is only a mixed product if the cotton fabric is itself a mixed fabric being made from yarns classified in two separate headings or if the cotton yarns used are themselves mixtures.
Example:

If the tufted textile fabric concerned had been made from cotton yarn of heading 52.05 and synthetic fabric of heading 54.07, then, obviously, the yarns used are two separate basic textile materials and the tufted textile fabric is accordingly a mixed product.
Example:

A carpet with the tufts made from both artificial yarns and cotton yarns and with a jute backing is a mixed product because three basic textile materials are used. Thus, any non-originating materials that are at a later stage of manufacture than the rule allows may be used, provided their total weight dies not exceed 10% of the weight of the textile materials of the carpet. Thus, both the jute backing and/or the artificial yarns could be imported at that stage of manufacture, provided the weight conditions are met.

5.3 In the case of products incorporating "yarn made of polyurethane segmented with flexible segments of polyether whether or not gimped" this tolerance is 20% in respect of this yarn.

5.4 In the case of products incorporating "strip consisting of a core of aluminium foil or of a core of plastic film whether or nor coated with aluminium powder, of a width not exceeding 5 mm, sandwiched by means of adhesive between two layers of plastic film", this tolerance is 30% in respect of this strip.

Note 6:

6.1. In the case of those textile products which are marked in the list by a footnote referring to this note, textile materials, with the exception of linings and interlinings, which do not satisfy the rule set out in the list in column 3 for the made-up product concerned may be used provided that they are classified in a heading other than that of the product and that their value does not exceed 8% of the ex-works price of the product.

6.2. Without prejudice to Note 6.3, materials which are not classified within Chapters 50 to 63 may be used freely in the manufacture of textile products, whether or not they contain textiles.
Example:

If a rule in the list provides that for a particular textile item, such as trousers, yarn must be used, this does not prevent the use of metal items, such as buttons, because buttons are not classified within Chapters 50 to 63. For the same reason, it does not prevent the use of slide-fasteners even though slide-fastners normally contain textiles.

6.3. Where a percentage rules applies, the value of materials which are not classified within Chapters 50 to 63 must be taken into account when calculating the value of the non-originating materials incorporated.

Note 7:

7.1. For the purposes of headings ex 27.07, 27.13 to 27.15, ex 29.01, ex 29.02 and ex 34.03, the "specific processes" are the following:

(a) vacuum distillation;

(b) redistillation by a very thorough fractionation process (i) [(i) See additional explanatory note 4(b) to chapter 27 of the Combined Nomenclature];

(c) cracking;

(d) reforming;

(e) extraction by means of selective solvents;

(f) the process comprising all the following operations: processing with concentrated sulphuric acid, oleum or sulphuric anhydride; neutralisation with alkaline agents; decolororisation and purification with naturally active earth, activated earth, activated charcoal or bauxite;

(g) polymerisation;

(h) alkylation;

(i) isomerisation.

7.2. For the purposes of headings 27.10, 27.11 and 27.12, the "specific processes" are the following:

(a) vacuum distillation;

(b) redistillation by a very thorough fractionation process (1); [See additional explanatory note 4(b) to Chapter 27 of the Combined Nomenclature).

(c) cracking;

(d) reforming;

(e) extraction by means of selective solvents;

(f) the process comprising all the following operations: processing with concentrated sulphuric acid, oleum or sulphuric anhydride; neutralisation with alkaline agents; decolorisation and purification with naturally active earth, activated earth, activated charcoal and bauxide;

(g) polymerisation;

(h) alkylation;

(ij) isomerisation;

(k) in respect of heavy oils falling within heading ex 27.10 only, desulphurisation with hydrogen resulting in a reduction of at least 85% of the sulphur content of the products processed (ASTM D 1266-59 T method);

(l) in respect of products falling within heading 27.10 only, deparaffining by a process other than filtering;

(m) in respect of heavy oils falling within heading ex 27.10 only, treatment with hydrogen at a pressure of more than 20 bar and a temperature of more than 250°C with the use of a catalyst, other than to effect desulphurisation, when the hydrogen constitutes an active element in a chemical reaction. The further treatment with hydrogen of lubricating oils of heading ex 27.10 (e. g. hydrofinishing or decolorisation) in order, more especially, to improve colour or stabillity shall not, however, be deemed to be a specific process;

(n) in respect of fuel oils falling within heading ex 27.10 only, atmospheric distillation, on condition that less than 30% of these products distils, by volume, including losses, at 300°C by the ASTM D 86 method;

(o) in respect of heavy oils other than gas oils and fuel oils falling within heading ex 27.10 only, treatment by means of a high-frequency electrical brush-discharge.

7.3. For the puposes of headings ex 27.07, 27.13 to 27.15, ex 29.01, ex 29.02 and ex 34.03, simple operations such as cleaning, decanting, desalting, water separation, filtering, colouring, marking, obtaining a sulphur content as a result of mixing products with different sulphur contents, any combination of these operations or like operations do not confer origin

ANNEX V

SUPPLIER'S DECLARATION

The supplier's declaration, the text of which is given below, must be made out in accordance with the footnotes. However, the footnotes do not have to be reproduced

SUPPLIER'S DECLARATION

FOR GOODS WHICH HAVE UNDERGONE WORKING OR PROCESSING IN SACU WITHOUT HAVING OBTAINED PREFERENTIAL ORIGINATING STATUS

I, the undersigned, supplier of the goods covered by the annexed document declare that:

1. the following materials which do not originate in SACU have been used in SACU to produce these goods:

Description of the goods supplied (1)	Description of non-originating materials used	HS heading of non-originating material used (2)	Value of non-originating materials used (2) (3)
.....			
.....			
.....			
		Total value	.....

.....
(Place and date)

.....

.....

.....

(Address and signature of the supplier, in addition the name of the person signing the declaration has to be indicated in clear script)

2. all the other materials used in SACU to produce these goods originate in SACU.

(1) When the invoice, delivery note or other commercial document to which the declaration is annexed relates to different kinds of goods, or to goods which do not incorporate non-originating materials to the same extent, the supplier must clearly differentiate them.

Example:
The document relates to different models of electrical motors of heading 8501 to be used in the maufacture of washing machines of heading 8450. The types and value of the non-originating materials used in the manufacture of these motors differ from one model to another. The models must therefore be differentiated in the first column and the indications in the other columns must be provided separately for each of the models to make it possible for the manufacturer of washing machines to make a correct assessment of the originating status of his products depending on which model of electrical motor he uses.

(2) The indications requested in these columns should only be given if they are necessary.

Examples:
The rule for garments of ex Chapter 62 says that non-originating yarn may be used. If a manufacturer of such garments in France uses fabric imported from Norway which has been obtained there by weaving non-originating yarn, it is sufficient for the Norwegian supplier to describe in his declaration the non-originating material used as yarn, without it being necessary to indicate the HS heading and value of such yarn.

A producer of iron wire of HS heading 7217 who has produced it from non-originating iron bars should indicate in the second column "bars of iron". Where this wire is to be used in the production of a machine, for which the origin rule contains a limitation for all non-originating materials used to a certain percentage value, it is necessary to indicate in the third column the value of the non-originating bars.

(3) "Value of materials" means the customs value at the time of importation of the non-originating materials used, or, if this is not known and cannot be ascertained, the first ascertainable price paid for the materials in SACU.
The exact value of each non-originating material used must be given per unit of the goods specified in the first column.

JOINT DECLARATION ON ANNEX II TO THE PROTOCOL ON RULES OF ORIGIN

Both Parties agree with the processing requirements contained in Annex II, subject to a limited number of amendments requested by South Africa both Parties undertake to address before the entry into force of the Agreement.

JOINT DECLARATION CONCERNING THE PROTOCOL ON RULES OF ORIGIN

For the implementation of Article 37 of this Protocol, the Commission is prepared to examine any request from South Africa for derogations from the rules of origin after signature of the Agreement.

JOINT DECLARATION CONCERNING THE REPUBLIC OF SAN MARINO

1. Products originating in the Republic of San Marino shall be accepted by South Africa as originating in the Community within the meaning of this Agreement.

2. Protocol 1 shall apply MUTATIS MUTANDIS for the purpose of defining the originating status of the above-mentioned products.

JOINT DECLARATION CONCERNING THE PRINCIPALITY OF ANDORRA

1. Products originating in the Principality of Andorra falling within Chapters 25 to 97 of the Harmonised System shall be accepted by South Africa as originating in the Community within the meaning of this Agreement.

   (c) operations to ensure the preservation of merchandise in good condition during transportation and storage, such as ventilation, spreading out, drying, freezing, making into a solution, removal of damaged parts and similar operations. This also includes loading, reloading or any other operation necessary to maintain the merchandise in good condition.

2. Mere dilution, blending and other types of mixing:

   (a) simple mixing of ingredients imported from outside the Member States;

   (b) mere dilution with water or another substance that does not meterially alter the characteristics of the material;

   (c) the addition of substances such as anti-caking agents, preservatives, wetting agent and the like;

   (d) diluting chemicals with inert ingredients to bring them to the standard degree of strength;

   (e) for the purposes of this sub-paragraph, dilution shall be taken not to include:

      (i) either mixing together of two bulk medicinal substances folowed by the packaging of the mixed products into individual doses for retail sale; or

      (ii) the addition of water or another substance to a chemical compound under presure which results in a reaction creating a new chemical compound.

3. Simple assembly or combining operations.

4. Other minor operations:

   (a) ornamental or finishing operations incidental to textile production designed to enhance the marketing appeal or ease the product's case, such as simple hand dyeing and printing, embroidery and applique, pleating, hemstitching, stone or acid washing, permanent pressing, or the attachment of accessories, findings and trimmings. The rules of origin for products of HS chapters 50 to 63 exported to SACU by MMTZ Member States, according to the provisions of paragraph 2(c) of Rule 2, may allow minor operations that would otherwise be non-origin conferring processes;

   (b) dismantling or disassembly;

   (c) repairs and alterations, washing, laundering or sterilisation;

   (d) application of preservatives or decorative coatings, including lubricants, protective encapsulation, preservative or decorative paint

or metalic coatings;

(e) testing, sorting or grading;

(f) marking, labeling or afixing other like distinguishing signs on products or their packages;

(g) simple operations such removal of dust, sifting or screening, sorting, classifying and matching, including the making up of sets, goods, greasing, washing, painting or cutting up.

5. Slaughter of animals.

6. Any process or work in respect of which it may be demonstrated, on the basis of the preponderance of evidence, that the sole objective was to circumvent these rules.

7. A combination of two or more insufficient working or processing operations does not confer origin, regardless of whether the product-specific rules of origin have been satisfied or not.

8. All the operations carried out in the Member States on a given product shall be considered together when determining whether they are to be regarded as insuficient within the meaning of this Rule.

RULE 4

GOODS WHOLLY PRODUCED IN THE MEMBER STATES

1. For the purposes of paragraph 1(a) of Rule 2 of this Annex, the following shall be regarded as wholly produced in the Member States:

   (a) Mineral products extracted from their ground or seabed;
   (b) Vegetable products harvested there;
   (c) Live animals born and raised there;
   (d) Product obtained there from live animals;
   (e) Products obtained by hunting or fishing conducted there;
   (f) Products of sea fishing and other products taken from the sea by their vessels;
   (g) Products made on board their factory ships exclusively from products referred to in sub-paragraph (f);
   (h) Used articles collected there fit only for the recovery of raw materials;
   (i) Waste and scrap resulting from manufacturing operations conducted there;
   (j) Products produced there exclusively from one or both of the following:

      (i) products specified in sub-paragraphs (a) to (i);
      (ii) materials containing no element imported from outside the Member States or of undetermined origin.

2. In determining the place of production of marine, river, or lake products and goods in relation to a Member State, a vessel of a Member State shall be regarded as part of the territory of that Member State. In determining the place from which goods originated, marine, river or lake products taken from the sea, river or lake or goods produced therefrom at sea or on a river or lake shall be regarded as having their origin in the territory of a Member State and have been brought directly to the territory of the Member State.

3. For the purpose of this Annex, a vessel shall be regarded as a vessel of a Member State if it is registered in a Member State and satisfies one of the following conditions:

   (a) The vessel sails under the flag of a Member State;

   (b) At least 75 per cent of the officers and crew of the vessel are nationals of a member State;

   (c) At least the majority control and equity holding in respect of the vessel are held by nationals of a Member State or institution, agency, enterprise or corporation of the Government of such Member State.

4. Electrical power, fuel, plant machinery and tools used in the production of goods shall always be regarded as wholly produced within the Region when determining the origin of the goods.

RULE 5

UNIT OF QUALIFICATION

1. Each item in a consignment shall be considered separately.

2. Notwithstanding the provisions of paragraph 1 of this Rule:

(a) Where the Harmonised System specifies that a group, set or assembly of article is to be classified within a single heading, such a group, set or assembly shall be treated as one article;

(b) Tools, parts and accessories which are imported with an article, and the price of which is included in that of the article or for which no separate charge is made, shall be considered as forming a whole with the article, provided that they constitute the standard equipment customarily included in the sale of articles of that kind;

(c) Notwithstanding the provisions of sub-paragraphs (a) and (b) of this paragraph, goods shall be treated as a single article if they are so treated for purposes of assessing Customs duties on like articles by the importing Member state.

3. An un-assembled or dis-assembled article which is imported in more than one consignment because it is not feasable for transport or production reasons to import it in a single consignment, shall be treated as one article.

RULE 6

SEPARATION OF MATERIALS

1. For those products or industries where it would be impracticable for the producers to separate physically materials of similar character but different origin used in the production of goods, such separation may be replaced by an appropriate accounting system which ensures that no more goods are deemed to originate in the Member State than would have been the case if the producer had been able to physically separate the materials.

2. Any accounting system shall conform to such conditions as may be agreed upon by the CMT in order to ensure that adequate control measures shall be applied.

RULE 7

TREATMENT OF MIXTURES

1. In the case of mixtures, not being groups, sets or assemblies of goods dealt with under Rule 5, any product resulting from the mixing together of goods originating in the Member States with goods which would not qualify as originating in the Member States, would not qualify as originating if the characteristics of the product as a whole are not different from the characteristics of the goods which have been mixed.

2. In the case of particular products where it is recognised by the CMT to be desirable to permit mixing of the kind described in paragraph 1 of this Rule, such products shall be accepted as originating in the Member States in respect of such part thereof as may be shown to correspond to the quantity of goods or originating in the Member States used in the mixing, subject to such conditions as may be agreed by the CMT.

RULE 8

TREATMENT OF PACKING

1. Where for purposes of assessing Customs duties, a Member State treats the origin of the goods separately from the origin of the packing, it may also, in respect of its imports consigned from another Member State, determine separately the origin of such packing.

2. Where paragraph 1 of this Rule is not applicable, packing shall be considered as forming a whole with the goods and not part of any packing

required for their transport or storage shall be considered as having been imported from outside the Member States when determining the origin of the goods as a whole.

3. For the purposes of paragraph 2 of this Rule, packing with goods which are ordinarily sold at retail shall not be regarded as packing required for the transport or storage of goods.

4. Containers which are purely for the transport and temporary storage of goods and are to be returned shall not be subject to Customs duties and other charges of equivalent effect. Where containers are not returned, they shall be treated separately from the goods contained in them and be subject to Customs duties and other charges of equivalent effect.

RULE 9

DOCUMENTARY EVIDENCE

1. The claim that goods shall be accepted as originating from a Member State in accordance with the provision of this Annex shall be supported by a certificate given by the exporter or their authorized representative in the form prescribed in Appendix II of this Annex. The certificate shall be authenticated with a seal by an authority designated for this purpose by each Member State.

2. Every producer, where such producer is not the exporter, shall, in respect of goods intented for export, furnish the exporter with a written declaration in conformity with Appendix III of this Annex to the effect that the goods qualify as originating in the member State under the provisions of Rule 2 of this Annex.

3. The competent authority designated by an importing Member State may in exceptional circumstances and notwithstanding the presentation of a certificate issued in accordance with the provisions of this Rule, require, in case of doubt, further verification of the statement contained in the certificate. Member States, through their competent authorities, shall assist each other in this process. Such further verification should be made within three months of the rquest being made by a competent authority designated by the importing Member State. The form used for this purpose shall be that contained in Appendix IV to this Annex.

4. The importing Member State shall not prevent the importer from taking delivery of goods solely on the grounds that it requires further evidence, but may require security for any duty or other charge which may be payable: provided that where goods are subject to any prohibitions, the consitions for delivery under security shall not apply.

5. Copies of certificates of origin and other relevant documentary evidence shall be preserved by the appropriate authorities of the Member States for at least five years.

6. All Member States shall deposit with the Secretariat the names of Departments and Agencies authorized to issue the certificates required under this Annex, specimen signatures of officials authorized to sign the certificates and the impressions of the official stamps to be used for that purpose, and those shall be circulated to the Member States by the Secretariat.

RULE 10

INFRINGEMENT AND PENALTIES

1. The Member States undertake to introduce legislation where such legislation does not exist, making such provision as may be necessary for penalties against persons who, in their territories, furnish or cause to be furnished documents which are untrue in any material sense, paricularly in support of a claim in another Member State.

2. Any Member State to which an untrue claim is made in respect of the origin of goods shall immediately bring the issue to the attention of the exporting Member State from which the untrue claim is made, in accordance with the provisions on mutual assistance and co-operation in customs matters as contained in Appendix I of Annex II of this Protocol.

3. Continued infringement by a Member State of the provisions of this Annex may be dealt with in accordance with the provisions of Annex VI of this Protocol.

RULE 11

DEROGATIONS

1. Notwithstanding the provisions of Rules 2 and 3 of this Annex, derogations may be granted by the CMT where the development of existing industries or the creation of new industries is justified.

2. The Member States shall make the request for a derogation for existing or new industries to the CMT.

3. In order to facilitate the examination of the request for derogation, the Member State making the request, shall provide the CMT with the fullest possible information as to the reason for the request.

4. The CMT shall respond to each Member State's request which is duly justified and in conformity with this Rule, provided no serious injury is caused to any established industry within the Region.

5. The CMT shall take steps necessary to ensure that a decision is reached as soon as possible and in any case not later than 90 working days after the request is received.

6. The derogation shall be valid for a specific period to be determined by the CMT.

RULE 12

REGULATIONS

The CMT shall adopt regulations to facilitate the implementation of this Annex.

APPENDIX I TO ANNEX I

INTRODUCTORY NOTES TO THE LIST OF CONDITIONS REGARDING WORKING AND PROCESSING CARRIED OUT ON NON-ORIGINATING MATERIALS THAT CONFERS ORIGINATING STATUS

Note 1:

The list sets out the conditions required for all products to be considered as sufficiently worked or processed within the meaning of paragraph 2 of Rule 2 of Annex 1 of this Protocol.

Note 2.:

2.1: The first two columns in the list describe the product obtained. The first column gives the heading number or chapter number used in the Harmonised System and the second column gives the description of goods used in that System for that heading or chapter. For each entry in the first two columns a rule is specified in column 3. Where, in some cases, the entry in the first column is preceeded by an "ex", this signifies that the rules in column 3 apply only to the part of that heading as described in column 2. Optional rules in column 4 only apply to textile and clothing products of HS chapters 50 to 63 exported by MMTZ to SACU under the quota system.

2.2: Where several heading numbers are grouped together in column 1 or a chapter number is given and the description of products in column 2 is therefor given in general terms, the adjacent rules in columns 3 or 4 apply to all products which, under the Harmonised System, are classified in headings of the chapter or in any of the headings grouped together in column 1.

2.3: Where there are different rules in the list applying to different products within a heading, each indent contains the description of that part of the heading covered by the adjacent rules in columns 3 or 4.

Note 3:

3.1: The provisions of Rule 2 of Annex 1 of this Protocol concerning products having acquired originating status which are used in the manufacture of other products apply regardless of whether this staus has been acquired inside the factory where these products are used or in another factory in the Region.

For example*, an engine of heading 8407, for which the rule may state that the value of non-originating materials which may be incorporated may not exceed a certain percentage of the ex-works price, is made from "other alloy steel roughly shaped by forging" of heading ex 7224.

If this forging has been forged in the Region from a non-originating ingot, it has already acquired originating status by virtue of the rule applicable to products of HS chapter 72 in the list. The forging can then count as originating in the value calculation for the engine regardless of whether it was prodced in the same factory or in another factory in the Region. The value of the non-originating ingot is thus not taken into account when adding up the value of the non-originating materials used.

*This example is given for the purpose of explanation only. It is not legally binding.

3.2: The rule in the list represents the minimum amount of working or processing required and the carrying out of more working or processing also confers originating status; conversely, the carrying out of less working or processing cannot confer originating status. Thus if a rule provides that non-originating material at a certain level of manufacture may be used, the use of such material at an earlier stage of manufacture is allowed and the use of such material at a later stage is not.

3.3: When a rule in the list specifies that a product may be manufactured from more than one material, this means that any one or more materials may be used. It does not require that all be used.

For example*, the rule for fabrics of headings 5208 to 5212 provides that natural fibres may be used and that chemical materials, among other materials, may also be used. This does not mean that both have to be used; it is possible to use one or the other or both.

3.4: Where a rule in the list specifies that a product must be manufactured from a particular metarial, the condition obviously does not prevent the use of other materials which, because of their inherent nature, cannot satisfy the rule. (See also Note 6.2 below in relation to textiles).

For example*, in the case of an article of apparel of ex chapter 62 made from non-woven mateials, if the use of only non-originating yarn is allowed for this class of article, it is not possible to start from non-woven cloth, even if non-woven cloths cannot normally be made from yarn. In such cases, the starting material would normally be at the stage before yarn, that is the fibre stage.

Note 4:

4.1: The term "natural fibres" is used in the list to refer to fibres other than artificial or synthetic fibres. It is restricted to the stages before spinning takes place, including waste, and, unless otherwise specified, includes fibres that have been carded, combed or otherwise processed but not spun.

4.2: The term "natural fibres" includes horsehair of heading 0503, silk of headings 5002 and 5003 as well as the wool fibres, fine or coarse animal hair of headings 5101 to 5105, the cotton fibres of headings 5201 to 5203 and the other vegetable fibres of headings 5301 to 5305.

4.3: The term "textile pulp", "chemical materials" and "paper-making materials" are used in the list to describe the materials not classified in Chapters 50 to 63, which can be used to manufacture artificial, synthetic or paper fibres or yarns.

4.4: The term "man-made staple fibres" is used in the list to refer to synthetic or artificial filament tow, staple fibres or waste, of headings 5501 to 5507.

Note 5:

5.1: The conditions set out in column 3 or 4 shall not be applied to any basic textile matarials, used in the manufacture of this product, which, taken together, represent 10 per cent or less of the total weight of all the basic textile materials used(See also Notes 5.3 and 5.4 below).

5.2: However, the tolerance mentioned in Note 5.1 may only be applied to mixed products which have been made from two or more basic textile materials.

The following are basic textile materials:

- silk,
- wool,
- coarse animal hair,
- fine animal hair,
- horsehair,
- cotton,

- paper-making materials and paper,
- flax,
- true hemp,
- jute and other textile bast fibres,
- sisal and other textile fibres of the genus Agave,
- coconut, abaca, ramie and other vegetable textile fibres,
- synthetic man-made filaments, artificial man-made filaments,
- synthetic man-made staple fibres of polypropylene,
- synthetic man-made staple fibres of polyester,
- synthetic man-made staple fibres of polyamide,
- synthetic man-made staple fibres of polyacrylonitrile,
- synthetic man-made staple fibres of polyimide,
- synthetic man-made staple fibres of polytetrafluoroethylene,
- synthetic man-made staple fibres of polyphenylene sulphide,
- synthetic man-made staple fibres of polyvinyl chloride,
- other synthetic man-made staple fibres,
- artificial man-made staple fibres of viscose,
- other artificial man-made staple fibres,
- yarn made of polyurethane segmented with flexible segments of polyether whether or not gimped,
- yarn made of polyurethane segmented with flexible segments of polyester whether or not gimped,
- products of heading 5605 (metalised yarn) incorporating strip consisting of a core of aluminium exceeding 5 mm, sandwiched by means of a transparent or coloured adhesive between two layers of plastic film,
- other products of heading 5605.

For example*, a yarn of heading 5205 made from cotton fibres of heading 5203 and synthetic staple fibres of heading 5506 is a mixed yarn. Therefore, non-originating synthetic staple fibres that do not satisfy the origin rules (which may require manufacture from chemical materials or textile pulp) may be used up to a weight of ten per cent of the yarn.

For example*, a woollen fabric of heading 5112 made from woollen yarn of heading 5107 and synthetic yarn of staple fibres of heading 5509 is a mixed fabric. Therefore, synthetic yarn which does not satisfy the origin rules (which may require manufacture from chemical materials or textile pulp) or woollen yarn that does not satisfy the origin rules (which require manufacture from natural fibres, not carded or combed or otherwise prepared for spinning) or a combination of the two may be used provided their total weight does not exceed ten per cent of the weight of the fabric.

For example*, tufted textile fabric of heading 5802 made from cotton yarn of heading 5205 and cotton fabric of heading 5210 is only a mixed product if the cotton fabric is itself a mixed fabric being made from yarns classified in two separate headings or if the cotton yarn used are themselves mixtures.

For example*, if the tufted fabric concerned has been made from cotton yarn of heading 5205 and synthetic fabric of heading 5407, then, obviously, the yarns used are two separate basic materials and the tufted textile fabric is accordingly a mixed product

5.3: In case of products incorporating "yarn made of polyurethane segmented with flexible segments of polyether whether or not gimped" this tolerance is 20 per cent in respect of this yarn.

5.4: In the case of products incorporating "strip consisting of a core of aluminium foil or of a core of plastic film whether or not coated with aluminium powder, of a width not exceeding 5 mm, sandwiched by means of an adhesive between two layers of plastic film", this tolerance

is 30 per cent in respect of this strip.

Note 6:

6.1: Textile materials, with the exception of linnings and interlinnings, which do not satisfy the rule set out in the list in column 3 or 4 for made-up product concerned may be used provided that they are classified in a heading other than that of the product and their value does not exceed 8 per cent of the ex-works price of the product.

6.2: Without prejudice to Note 6.3, materials which are not classified within Chapters 50 to 63 may be used freely in the manufacture of textile products, whether or not they contain textiles.

For example*, if a rule in the list provides that for particular textile items yarn must be used, this does not prevent the use of metal items, such as buttons, because buttons are not classified within Chapters 50 to 63. For the same reason, it does not prevent the use of slide-fasteners, even though slide-fasteners normally contain textiles.

6.3: Where a percentage rule applies, the value of materials which are not classified within Chapters 50 to 63 must be taken into account when calculating the value of the non-originating materials incorporated.

LIST OF CONDITIONS REGARDING WORKING AND PROCESSING CARRIED OUT ON NON-ORIGINATING MATERIALS THAT CONFERS ORIGINATING STATUS

The text in the document attached hereto, entitled "Consolidated Negotiating Text", contains the status of the negotiations on rules of origin after the Committee of Senior Officials held on 28th - 29th July 2000, in Windhoek, Namibia. As such, it contains both agreed and non-agreed rules, including proposals by Member States.

For the purpose of implementation at the national level on 1st September 2000, Member States shall excerpt from text attached hereto the agreed rules and incorporate them in their national legislation according to their national regulations and procedures in the format shown below. Negotiations will continue in the High Level Committee to reach agreement on the outstanding chapters and headings.

ANNEX VII

CONCERNING TRADE IN SUGAR IN THE SOUTHERN AFRICAN DEVELOPMENT COMMUNITY

PREAMBLE

The High Contracting Parties:

HAVING REGARD to the objectives of the Protocol and of its importance as an instrument to facilitate the achievement of the aim of regional economic integration and the creation of a single market through increased harmonisation of policies and liberalisation of tariffs and removal of NTBs on trade;

NOTING, however, that the world sugar market is highly distorted and conscious of the fact that the world price for sugar is a dumped or subsidised price resulting in the continuing need for most sugar producing countries to impose tariffs and NTBs against the free importation of sugar in order to protect their domestic industries;

RECOGNISING, therefore, that for as long as the world sugar market remains highly distorted, sugar will be a product requiring special dispensation within the framework of this Protocol so that no sugar industry within the Region will suffer injury;

MINDFUL of the need to establish a stable investment climate leading to both growth and development of SADC economies and the need to maintain the Region as a reliable bloc of world competitive low cost sugar producers, well positioned to take advantage of the anticipated higher world prices once global liberalisation in sugar trade occurs;

ACKNOWLEDGING the need to improve and maintain the efficiency of all sugar producers within the Region through the exchange of research, training and information;

HEREBY AGREE as follows:

ARTICLE 1

DEFENITIONS

In this Annex, an expression that has been defined in this Protocol has that meaning and, unless the context indicates otherwise:

"Marketing Yaer" means a period of twelve months commencing on 1 April and ending 31 March, and "annual" and "annum" shall have a corresponding meaning;

"MTTQ" means metric tons tel quel;

"Net surplus producer" means a sugar producing Member State, which has a net surplus production;

"Net surplus production" means the sugar wholly produced in any marketing year by a sugar producing Member State in excess of the sugar required to satisfy its total domestic consumption and to fulfil its prerential quotas granted by the European Union, the United States of America and any similar preferntial quota granted to it or which may be granted to it in the future by any third country or bloc of third countries, and in the case of other Member States, the quantity of sugar per annum which are sold into SACU in terms of preferential trade agreements;

"Preferential quota" means a tariff rate quota with preferential customs duties applying under the quota limit;

"Sugar" means raw sugar, refined sugar and direct consumption crystal sugar;

"Technical Committee on Sugar (TCS)" means the body comprising representatives of Member States and sugar industries in all Member States;

"Ton" means a metric ton of sugar, tel quel.

ARTICLE 2

OBJECTIVES

The objectives of this Annex are:

(a) to promote, within the Region, production and consumption of sugar and sugar-containing products according to fair trading conditions and an orderly regional market in sugar for the survival of the sugar industries in all sugar producing Member States, in anticipation of freer global trade;

(b) in support of the long term objectice set out in paragraph 1 of Article 3, to provide temporary measures to insulate Member States' sugar producing industries from the destabilising effects of the distorted global market and, in this regard, to harmonise sugar policies and regulate its trade within the Region during the interim period until world trade conditions permit freer sugar trade.

(c) to create a stable climate for investment, leasding to the growth and development of sugar industries in the Member States;

(d) to improve the competitiveness of the sugar producing Member States in the world sugar market;

(e) to facilitate the sharing of information, research and training with a view to improving the efficiency of growers, millers and refiners of sugar in the Member States;

(f) to facilitate the development of small and medium sugar enterprises; and

(g) to create stable market conditions in the Member States so as to encourage the rehabilitation and development of all sugar industries with a view to facilitating direct foreign investment and the creation of employment opportunities.

ARTICLE 3

RECIPROCAL MARKET LIBERALISATION

1. The long term objective of this Annex is to establish full liberalisation of trade in the sugar sector in the Region after the year 2012. Such liberalisation will be dependent on a positive review of conditions prevailing in the world sugar market five years after entry into force of this Annex in order to ascertain if the world sugar market has normalised sufficiently to make such liberalisation acceptable.

2. The liberalisation contemplated in paragraph 1 will be on a reciprocal basis and will also involve the removal of NTBs in relation to SADC sugar trade. However, in the interim period, market access will be on a non-reciprocal basis into the SACU on the terms outlined in Articles 4, 5 and 6.

ARTICLE 4

NON-RECIPROCAL ACCESS TO THE SACU MARKET BASED ON MARKET GROWTH

1. A portion of the SACU sugar market, based on the annual growth in that market, will be allocated to each SADC net surplus producer according to each producer's relative net surplus production.

2. The denominator for the calculation of each net surplus producer's share will be the total SADC net surplus production.

3. Annual growth of the SACU market will be deemed to be 45 000 tons in marketing year one, 91 000 tons in marketing year two and 138 000 tons in marketing year three. In marketing years four and five the growth shall be reviewed on the basis of the actual growth in the SACU market during the prior three marketing years, with minimum access for these marketing years set at 138 000 tons.

ARTICLE 5

ADDITIONAL NON-RECIPROCAL ACCESS TO NON-SACU SADC SURPLUS SUGAR PRODUCING MEMBER STATES

1. Duty free access to the SACU sugar market of 20 000 tons of sugar per annum shall be available to the non-SACU SADC surplus sugar producing Member States and will be allocated according to each producers' relative net surplus production.

2. The denominator for the calculation of each net surplus producer's share will be that the total non-SACU SADC net surplus production.

3. In the event of the non-SACU SADC net surplus production being less than 20 000 tons, then the duty-free access to the SACU market shall be limited to the actual net surplus production.

ARTICLE 6

GENERAL PROVISIONS RELATING TO MARKET ACCESS

1. Access will be established through duty-free quotas extended to net surplus sugar producers.

2. Duty-free quotas, as contemplated in paragraph 1, will be calculated in each marketing year on the basis of production, consumption and export forecasts for the year in question. Initial forecasts will be submitted in February of each year based on production, consumption and export forecasts for the coming marketing year, and reviewed at the end of June of that year. Access thus established will be adjusted in the succeeding marketing year or as soon as possible thereafter on the basis of actuals. Submitted forecasts will be reviewed by the TCS in consultation with the Member States.

3. The determined allocations are not transferable between Member States. In the case of FORCE MAJEURE, the quantities not supplied will be redistributed according to actual production, consumption and export figures of the remaining net surplus producers.

4. Quantities will be measured in MTTQ.

5. Any new sugar producer in the Region will be accomodated in this Annex.

ARTICLE 7

CO-OPERATION IN AREAS OF COMMON INTEREST

1. Co-operation in areas of common interest as defined by the TCS will be aimed at facilitating a balanced expansion of national industries with the ultimate objective of promoting the development of a regional competitive industry. Co-operation in the following areas shall be established with a view to increasing efficiencies of all SADC sugar producers:

   (b) Recognising established official customs co-operation arrangements, the TCS will make recommendations to such bodies on issues related to cross-border trade in sugar in the Region aimed at improving information flows on trade in sugar in the Region and improving border control.

   (c) Information on the nature and performance of existing national initiatives pertaining to the development of small- and medium size enterprises will be shared. Information on similar initiatives in other parts of the world will be collected and considered. Such information could be used to design appropriate stategies for small- and medium size enterprise development.

   (d) Developments occurring in the rest of the world which have implications for sugar industries in the Region will be identified and monitored, and pro-active regional strategies will be pursued.

2. The TCS will establish terms of reference relating to the implementation of actions in the identified and new areas of co-operation, and may appoint technical working groups to obtain related information and submit recommendations.

ARTICLE 8

IMPLEMENTATION

1. Market access as provided for in Article 4 will be effected on 1 April 2001.

2. Market access as provided for in Article 5 will be effected upon implementation of this Annex but the access tonnage will be established pro rata to the period remaining to 31 March 2001.

3. Co-operation in areas of common interest will be effected on 1 September 2000.

ARTICLE 9

INSTITUTIONAL FRAMEWORK

1. The TCS is hereby established to manage the agreed terms for market access and to co-ordinate actions in the areas of co-operation outlined in Article 7.

2. The TCS will establish a secretariat, the functions of which will be to implement and monitor the market access arrangements, procure and and collate statistical information concerning sugar from Member States, disseminate such information amongst Member States, and supply secretarial services to the SADC Sugar Committee and its Working Groups.

Where, in some cases, the entry in the first column is preceded by an "ex", this signifies that the rules in column 3 or 4 apply only to the part of that heading as described in column 2.

2.2. Where several heading numbers are grouped together in column 1 or a chapter number is given and the description of products in column 2 is therefor given in general terms, the adjacent rules in column 3 or 4 apply to all products which, under the Harmonized System, are classified in headings of the chapter or in any of the headings grouped together in column 1.

2.3. Where there are different rules in the list applying to different products within a heading, each indent contains the description of that part of the heading covered by the adjacent rules in column 3 or 4.

2.4. Where, for an entry in the first two columns, a rule is specified in both columns 3 and 4, the exporter may opt, as an alternative, to apply either the rule set out in column 3 or that set out in column 4. If no origin is given in column 4, the rule set out in column 3 is to be applied.

Note 3:

3.1. The provisions of Article 5 of the Annex, concerning products having acquired originating status which are used in the manufacture of other products, shall apply, regardless of whether this status has been acquired inside the factory where these products are used or in another factory in a State Party.

Example:

An engine of heading 8407, for which the rule states that the value of the non-originating materials which may be incort exceed 40 per cent of ex-works price, is made from "other alloy steel roughly shaped by forging" of heading ex 7224.

If this forging has been forged in the State Party concerned from a non-originating ingot, it has already acquired originating status by virtue of the rule for heading ex 7224 in the list. The forging can then count as originating in the value-calculation for the engine, regardless of whether it was produced in the same factory or in another factory in the State Party concerned. The value of the non-originating ingot is thus not taken into account when adding up the value of the non-originating materials used.

3.2. The rule in the list represents the minimum amount of working or processing required, and the carrying-out of more working or processing also confers originating status; conversely, the carrying-out of less working or processing cannot confer originating status. Thus, if a rule provides that non-originating material, at a certain level of manufacture, may be used, the use of such material at an earlier stage of manufacture is allowed, and the use of such material at alater stage is not.

3.3. Without prejudice to Note 3.2, where a rule uses the expression "Manufacrure from materials of any heading", then materials of any heading(s)

(even materials of the same description and heading as the product) may be used, subject, however, to any specific limitations which may also be contained in the rule.

However, the expression "Manufacture from materials of any heading, including materials of heading ....." or "Manufacture from materials of any heading, including other materials of the same heading as the product" means that materials of any heading(s) may be used, except those of the same description as the product as given in column 2 of the list.

3.4. When a rule in the list specifies that a product may be manufactured from more than one material, this means that one or more materials may be uesd. It does not require that all be used.

Example:

The rule for fabrics of headings 5306 to 5308 provides that natural fibres may be used and that chemical materials, may also be used. This does not mean that both have to be used; it is possible to use one or the other, or both.

3.5. Where a rule in the list specifies that a product must be manufactured from a particular material, the condition obviously does not prevent the use of other materials which, because of their inherent nature, cannot satisfy the rule. (See also Note 6.2 below in relation to textiles).

Example:

The rule for prepared foods of heading 1904, which specifically excludes the use of cereals and their derivatives, does not prevent the use of mineral salts, chemicals and other additives which are not products from cereals

However, this does not apply to products which, although they cannot be manufactured from the particular materials specified in the list, can be produced from a material of the same nature at an earlier stage of manufacture.

Example:

In the case of an article of apparel of ex Chapter 62 made from non-woven materials, if the use of only non-originating yarn is allowed for this class of article, it is not possible to start from non-woven cloth - even if non-woven cloths cannot normally be made from yarn. In such cases, the starting material would normally be at the stage before yarn - that is the fibre stage.

3.6. Where, in a rule in the list, two percentages are given for the maximum value of non-originating materials that can be used, then these percentages may not be added together. In other words, the maximum value of all the non-originating materials used may never exceed the higher of the percentages given. Furthermore, the individual percentages must not be exceeded, in relation to the particular materials to which they apply.

Note 4:

4.1. The term "natural fibres" is used in the list to refer to fibres other than artificial or synthetic fibres. It is restricted to the stages before spinning takes place, including waste, and, unless otherwise specified, includes fibres that have been carded, combed or otherwise processed, but not spun.

4.2. The term "natural fibres" includes horsehair of heading 0503, silk of headings 5002 and 5003, as well as wool-fibres and fine or coarse animal hair of headings 5101to 5105, cotton fibres of headings 5201 to 5203, and the other vegetable fibres of headings 5301 to 5305.

4.3. The term "textile pulp", "chemical materials" and "paper-making materials" are used in the list to describe the materials, not classified in Chapters 50 to 63, which can be used to manufacture artificial, synthetic or paper fibres or yarns.

4.4. The term "man-made staple fibres" is used in the list to refer to synthetic or artificial filament tow, staple fibres or waste, of headings 5501 to 5507.

Note 5:

5.1. Where, for a given product in the list, a reference is made to this Note, the conditions set out in column 3 shall not be applied to any basic textile materials used in the manufacture of this product and which, taken together, represent ten per cent or less of the total weight of all the basic textile materials used . (See also Notes 5.3 and 5.4 below).

5.2.1. However, the tolerance mentioned in Note 5.1 may be applied only to mixed products which have been made from two or more basic textile materials.

5.2.2. The following are the basic textile materials:

- silk, wool, coarse animal hair, fine animal hair, horsehair, cotton, paper-making materials and paper, flax, true hemp, jute and other textile bast fibres, sisal and other textile fibres of the genus Agave, coconut, abaca, ramie and other vegetable textile fibres, synthetic man-made filaments, artificial man-made filaments, current-conducting filaments, synthetic man-made staple fibres of polypropylene, synthetic man-made staple fibres of polyester, synthetic man-made staple fibres of polyamide, synthetic man-made staple fibres of polyacrylonitrile, synthetic man-made staple fibres of polyimide, synthetic man-made staple fibres of polytetrafluoroethylene, synthetic man-made staple fibres of poly(phenylene sulphide), synthetic man-made staple fibres of poly(vinyl chloride), other synthetic man-made staple fibres, artificial man-made staple fibres of viscose, other artificial man-made staple fibres,
- yarn made of polyurethane segmented with flexible segments of ployether, whether or not gimped,
- yarn made of polyurethane segmented with flexible segments of polyester, whether or not gimped,
- products of heading 5605 (metallised yarn) incorporating strip consisting of a core of aluminium foil or of a core of plastic film whether or not coated with aluminium powder, or of a width not exceeding 5 mm, sandwiched by means of a transparent or coloured adhesive between two layers of plastic film,
- other products of heading 5605.

Example:

A yarn, of heading 5205, made from cotton fibres of heading 5203 and synthetic staple fibres of heading 5506, is a mixed yarn. Therefore, non-originating synthetic staple fibres which do not satisfy the origin-rules (which require manufacture from chemical materials or textile pulp) may be used, provided that their total weight does not exceed ten per cent of the weight of the yarn.

Example:

A cotton yarn, of heading 5204, made from cotton yarn of heading 5205 and synthetic yarn of staple fibres of heading 5509, is a mixed yarn,

Therefore, synthetic yarn of which does not satisfy the origin rules (which require manufacture from chemical materials or textile pulp), or woollen yarn which which does not satisfy the origin rules (which require manufacture from natural fibres, not carded or combed or otherwise prepared for spinning), or a combination of the two, may be used, provided their total weight does not exceed ten per cent of the weight of the fabric.

Example:

If the tufted textile fabric concerned had been made from cotton yarn of heading 5205 and synthetic fabric of heading 5407, then, obviously, the yarns used are two separate basic textile materials and the tufted textile fabric is, accordingly, a mixed product.

5.3. In the case of products incorporating "yarn made of polyurethane segmented with flexible segments of polyether, whether or not gimped, this tolerance is 20 per cent in respect of this yarn.

5.4. In the case of products incorporating "strip consisting of a core of aluminium foil or of a core of plastic film whether or not coated with aluminium powder, of a width not exceeding 5 mm, sandwiched by means of a transparent or coloured adhesive between two layers of plastic film", this tolerance is 30 per cent in respect of this strip.

Note 6:

6.1. Where, in the list, reference is made to this Note, textile materials (with the exception of linnings and interlinnings), which do not satisfy the rule set out in the list in column 3 for the made-up product concerned, may be used, provided that they are classified in a heading other than that of the product and that their value does not exceed ieght per cent of the ex-works price of the product.

6.2. Without prejudice to Note 6.3, materials, which are not classified within Chapters 50 to 63, may be used freely in the manufacture of textile products whether or not they contain textiles.

Example:

If a rule in the list provides that, for a particular textile item (such as trousers), yarn must be used, this does not prevent the use of metal items, such as buttons, because buttons are not classified within Chapters 50 to 63. For the same reason, it does not prevent the use of slide-fasteners, even though slide-fasteners normally contain textiles.

6.3. Where a percentage-rule applies, the value of materials, which are not classified within Chapters 50 to 63, must also be taken into account when calculating the value of the non-originating materials incorporated.

Note 7:

7.1. For the purposes of headings ex 2707, 2713 to 2715, ex 2901, ex 2902 and ex 3403, the "specific processes" are the following:

(a) vacuum-distillation;
(b) redistillation by a very thorough fractionation process;
(c) cracking;
(d) reforming;
(e) extraction by means of selective solvents
(f) the process comprising all of the following operations: processing with concentrated sulphuric acid, oleum or sulphuric anhydride; neutralisation with alkaline agents; decolourisation and purification with naturally active earth, activated earth, activated charcoal or bauxite;
(g) polymerisation;
(h) alkylation;
(i) isomerisation.

7.2. For the purposes of headings 2710, 2711 and 2712, the "specific processes" are the following:

(a) vacuum-distillation;
(b) redistillation by a very thorough fractionation process;

(c) cracking;
(d) reforming;
(e) extraction by means of selective solvents;
(f) the process comprising all of the following operations; processing with concentrated sulphuric acid, oleum or sulphuric anhydride; neutralisation with alkaline agents; decolourisation and purification with naturally-active earth, activated earth, activated charcoal or bauxite;
(g) polymerisation;
(h) alkylation;
(ij) isomerisation;
(k) in respect of heavy oils of heading ex 2710 only, desulphurisation with hydrogen, resulting in a reduction of at least 85 per cent of the sulphur-content of the products processed (ASTM D 1266-59 T method);
(l) in respect of products of heading 2710 only, deparaffinning by a process other than filtering;
(m) in respect of heavy oils of heading ex 2710 only, treatment with hydrogen, at a pressure of more than 20 bar and a temperature of more than 250°C, with the use of a catalyst, other than to effect desulphurisation, when the hydrogen constitutes an active element in a chemical reaction. The further treatment, with hydrogen, of lubricating oils of heading ex 2710 (e.g. hydrofinishing or decolourisation), in order, more especially, to improve colour or stability shall not, however, be deemed to be a specific process;
(n) in respect of fuel oils of heading ex 2710 only, atmospheric didtillation, on condition that less than 30 per cent of these products distils, by volume, including losses, at 300°C by the ASTM D 86 method;
(o) in respect of heavy oils other than gas oils and fuel oils of heading ex 2710 only, treatment by means of a high-frequency electrical brush-discharge;
(p) in respect of crude products (other than petroleum jelly, ozokerite, lignite wax or peat wax, paraffin wax containing by weight less than 0.75 per cent of oil) of heading ex 2712 only, de-oiling by fractional crystallisation.

7.3. For the purposes of headings ex 2707, 2713 to 2715, ex 2901, ex 2902 and ex 3403, simple operations, such as cleaning, decanting, desalting, water-separation, filtering, colouring, marking, obtaining a sulphur-content as a result of mixing products with different sulphur contents, any combination of these operations or like operations, do not confer origin.

CHAPTER: 4

DAIRY PRODUCE; BIRDS' EGGS; NATURAL HONEY; EDIBLE PRODUCTS OF ANIMAL ORIGIN, NOT ELSEWHERE SPECIFIED OR INCLUDED

NOTES:

1. The expression "milk" means full cream milk or partially or completely skimmed milk.

2. For the purposes of heading 04.05:

   (a) The term "butter" means natural butter, whey butter or recombined butter (fresh, salted or rancid, including canned butter) derived exclusively from milk, with a milkfat content of 80 per cent or more but not more than 95 per cent by mass, a maximum milk solids not-fat content of 2 per cent by mass and a maximum water content of 16 per cent by mass. Butter does not contain added emulsifiers, but may contain sodium chloride, food colours, neutralising salts and cultures of harmless lactic-acid-producing bacteria.

   (b) The expression "dairy spreads" means a spreadable emulsion of the water-in-oil type, containing milkfat as the only fat in the product, with a milkfat content of 39 per cent or more but less than 80 per cent by mass.

3. Products obtained by the concentration of whey and with the addition of milk or milkfat are to be classified as cheese in heading 04.06 provided that they have the three following characteristics:

   (a) a milkfat content, by mass of the dry matter, of 5 per cent or more;

   (b) a dry matter content, by mass, of at least 70 per cent but not exceeding 85 per cent; and

   (c) they are moulded or capable of being moulded.

4. This Chapter does not cover the following:

   (a) products obtained from whey, containing by mass more than 95 per cent lactose, expressed as anhydrous lactose calculated on the dry matter (heading 17.02); or

   (b) albumins (including concentrates of two or more whey proteins, containing by mass more than 80 per cent whey proteins, calculated on the dry matter) (heading 35.02) or globulins (heading 35.04).

SUBHEADING NOTES:

1. For the purposes of subheading 0404.10, the expression "modified whey" means products consisting of whey constituents, that is to say, whey from which all or part of the lactose, proteins or minerals have been removed, whey to which natural whey constituents have been added, and products obtained by mixing natural whey constituents.
2. For the purposes of subheading 0405.10 the term "butter" does not include dehydrated butter or ghee (subheading 0405.90).

ADDITIONAL NOTES:

1. For the purposes of this Chapter "ultra high temperature (UHT) milk" or "long-life milk" is milk that has been heat-treated to the extent of being suitable for non-refrigerated storage prior to opening.

EDIBLE FRUIT AND NUTS; PEEL OF CITRUS FRUIT OR MELONS

NOTES:

1. This Chapter does not cover inedible nuts or fruits.

2. Chilled fruits and nuts are to be classified in the same headings as the corresponding fresh fruits and nuts.

3. Dried fruit or dried nuts of this Chapter may be partially rehydrated, or treated for the following purposes:

   (a) for additional preservation or stabilisation (for example, by moderate heat treatment, sulphuring, the addition of sorbic acid or potassium sorbate);

   (b) to improve or maintain their appearance (for example, by the addition of vegetable oil or small quantities of glucose syrup),

   provided that they retain the character of dried fruit or dried nuts.

CHAPTER: 10

CEREALS

NOTES:

1.

(A) The products specified in the headings of this Chapter are to be classified in those headings only if grains are present, whether or not in the ear or on the stalk.

(B) The Chapter does not cover grains which have been hulled or otherwise worked. However, rice, husked, milled, polished, glazed, parboiled or broken remains classified in Heading 10.06.

2. Heading 10.05 does not cover sweet corn (Chapter 7).

SUBHEADING NOTES:

1. The term "durum wheat" means wheat of the TRITICUM DURUM species and the hybrids derived from the inter-specific crossing of TRITICUM DURUM which have the same number (28) of chromosomes as that species.

CHAPTER: 11

PRODUCTS OF THE MILLING INDUSTRY; MALT; STARCHES; INULIN; WHEAT GLUTEN

NOTES:

1. This Chapter does not cover the following:

   (a) roasted malt put up as coffee substitutes (heading 09.01 or 21.01);

   (b) prepared flours, groats, meals or starches of heading 19.01;

   (c) corn flakes or other products of heading 19.04;

   (d) vegetables, prepared or preserved, of heading 20.01, 20.04 or 20.05;

   (e) pharmaceutical products (Chapter 30); or

   (f) starches having the character of perfumery, cosmetic or toilet preparations (Chapter 33).

2.

   (A) Products from the milling of the cereals listed in the table below fall in this Chapter if they have, by mass on the dry product:

      (a) a starch content (determined by the modified Ewers polarimetric method) exceeding that indicated in Column (2); and

      (b) an ash content (after deduction of any added minerals) not exceeding that indicated in Column (3).

      Otherwise, they fall in heading 23.02. However, germ of cereals, whole, rolled, flaked or ground, is always classified in heading 11.04.

   (B) Products falling in this Chapter under the above provisions shall be classified in heading 11.01 or 11.02 if the percentage passing through a woven metal wire cloth sieve with the aperture indicated in Column (4) or (5) is not less, by mass, than that shown against the cereal concerned.
   Otherwise they fall in heading 11.03 or 11.04.

Cereal	Starch content	Ash content	Rate of passage through a sieve with an aperture of	
			315 micrometers (microns)	500 micrometers (microns)
(1)	(2)	(3)	(4)	(5)
Wheat and rye	45%	2,5%	80%	-

Maize (corn) and grain sorghum	45%	2%	-	90%
Rice	45%	1,6%	80%	-
Buckwheat	45%	4%	80%	-

3. For the purposes of heading 11.03, the terms "groats" and "meal" mean products obtained by the fragmentation of cereal grains, of which:

(a) in the case of maize (corn) products, at least 95 per cent by mass passes through a woven metal wire cloth sieve with an aperture of 2 mm;

(b) in the case of other cereal products, at least 95 per cent by mass passes through a woven metal wire cloth sieve with an aperture of 1,25 mm.

SECTION: IV

PREPARED FOODSTUFFS; BEVERAGES, SPIRITS AND VINEGAR; TOBACCO AND MANUFACTURED TOBACCO SUBSTITUTES

NOTE:

1. In this Section the Term "pellets" means products which have been agglomerated either directly by compression or by the addition of a binder in a proportion not exceeding 3 per cent by mass.

CHAPTER: 16

PREPARATIONS OF MEAT, OF FISH OR OF CRUSTACEANS, MOLLUSCS OR OTHER AQUATIC INVERTEBRATES

NOTES:

1. This Chapter does not cover meat, meat offal, fish, crustaceans, molluscs and other aqua ic invertebrates, prepared or preserved by the processes specified in Chapter 2 or 3 or heading 05.04.

2. Food preparations fall in this Chapter provided that they contain more than 20 per cent by mass of sausage, meat, meat offal, blood, fish or crustaceans, molluscs or other aquatic invertebrates, or any combination thereof. In cases where the preparation contains two or more of the products mentioned above, it is classified in the heading of Chapter 16 corresponding to the component or components which predominate by mass. These provisions do not apply to the stuffed products of heading 19.02 or to the preparations of heading 21.03 or 21.04.

SUBHEADING NOTES:

1. For the purposes of subheading 1602.10, the expression "homogenised preparations" means preparations of meat, meat offal or blood, finely homogenised, put up for retail sale as infant food or for dietetic purposes, in containers of a net mass content not exceeding 250 g. For the application of this definition no account is to be taken of small quantities of any ingredients which may have been added to the preparation for seasoning, preservation or other purposes. These preparations may contain a small quantity of visible pieces of meat or meat offal. This subheading takes precedence over all other subheadings of heading 16.02.
2. The fish and crustaceans specified in the subheadings of heading 16.04 or 16.05 under their common names only, are of the same species as those mentioned in Chapter 3 under the same name.

ADDITIONAL NOTE:

1. For the purpose of subheading 1602.49.30 the expression "rib" shall be limited to rib portions having on one side a maximum meat thickness of 5 mm covering the bone while the opposite side of the bone is clearly visible.

CHAPTER: 25

SALT; SULPHUR; EARTHS AND STONE; PLASTERING MATERIALS, LIME AND CEMENT

NOTES:

1. Except where their context or Note 4 to this Chapter otherwise requires, the headings of this Chapter cover only products which are in the crude state or which have been washed (even with chemical substances eliminating the impurities wi hout changing the structure of the product), crushed, ground, powdered, levigated, sifted, screened, concentrated by floatation, magnetic separation or other mechanical or physical processes (except crystallisation), but not products which have been roasted, calcined, obtained by mixing or subjected to processing beyond that mentioned in each heading. The products of this Chapter may contain an added anti-dusting agent, provided such addition does not render the product particularly suitable for specific use rather than for general use.

2. This Chapter does not cover the following:

   (a) sublimed sulphur, precipitated sulphur and colloidal sulphur (heading 28.02);

   (b) earth colours containing 70 per cent or more by mass of combined iron evaluated at Fe(2)O(3) (heading 28.21);

   (c) medicaments and other products of Chapter 30;

   (d) perfumery, cosmetic or toilet preparations (Chapter 33);

   (e) setts, curbstones and flagstones (heading 68.01), mosaic cubes and the like (heading 68.02); roofing, facing or damp course slates (heading 68.03);

Headings 26.01 to 26.17 do not, however, include minerals which have been submitted to processes not normal to the metallurgical industry.

3. Heading 26.20 applies only to the following:

   (a) slag, ash and residues of a kind used in industry either for the extraction of metals or as a basis for the manufacture of chemical compounds of metals (excluding ash and residues from the incineration of municipal waste) (heading 26.21); and

SUBHEADING NOTES:

1. For the purposes of subheading 2620.21, "leaded gasoline sludges and leaded anti-knock compound sludges" mean sludges obtained from storage tanks of leaded gasoline and leaded anti-knock compounds (for example, tetraethyl lead), and consisting essentially of lead, lead compounds and iron oxide.

MINERAL FUELS, MINERAL OILS AND PRODUCTS OF THEIR DISTILLATION; BITUMINOUS SUBSTANCES; MINERAL WAXES

NOTES:

1. This Chapter does not cover the following:

   (a) separate chemically defined organic compounds, excluding pure methane and propane which are to be classified in heading 27.11;

   (b) medicaments of heading 30.03 or 30.04; or

   (c) mixed unsaturated hydrocarbons of heading 33.01, 33.02 or 38.05.

2. References in heading 27.10 to "petroleum oils and oils obtained from bituminous minerals" include not only petroleum oils and oils obtained from bituminous minerals but also similar oils, as well as those consisting mainly of mixed unsaturated hydrocarbons, obtained by any process, provided the mass of the non-aromatic constituents exceeds that of the aromatic constituents.
   However, the references do not include liquid synthetic polyolefins of which less than 60 per cent by volume distils at 300°C, after conversion to 1,013 millibars when a reduced-pressure distillation method is used (Chapter 39).
3. For the purposes of heading 27.10, "waste oils" means waste containing mainly petroleum oils and oils obtained from bituminous minerals (as described in Note 2 to this Chapter), whether or not mixed with water. These include:
   (a) such oils no longer fit for use as primary products (for example, used lubricating oils, used hydraulic oils and used transformer oils);

   (b) sludge oils from the storage tanks of petroleum oils, mainly containing such oils and a high concentration of additives (for example, chemicals) used in the manufacture of primary products; and

   (c) such oils in he form of emulsions in water or mixtures with water, such as those resulting from oil spills or storage tank washings, or from the use of cutting oils for machining operations.

ORGANIC CHEMICALS

NOTES:

1. Except where the context otherwise requires, the headings of this Chapter apply only to the following:

   (a) separate chemically defined organic compounds, whether or not containing impurities;

   (b) mixtures of two or more isomers of the same organic compound (whether or not containing impurities), except mixtures of acyclic hydrocarbon isomers (excluding stereoisomers), whether or not saturated (Chapter 27);

   (c) the products of headings 29.36 to 29.39 or the sugar ethers, sugar acetals and sugar esters, and their salts, of heading 29.40, or the products of heading 29.41, whether or not chemically defined;

   (d) the products mentioned in (a), (b) or (c) above dissolved in water;

   (e) the products mentioned in (a), (b) or (c) above dissolved in other solvents provided the solution constitutes a normal and necessary method of putting up these products adopted solely for reasons of safety or for transport and that the solvent does not render he product particularly suitable for specific use rather than for general use;

   (f) the products mentioned in (a), (b), (c), (d) or (e) above with an added stabiliser (including an anti-caking agent) necessary for their preservation or transport;

   (g) the products mentioned in (a), (b), (c), (d), (e) or (f) above with an added anti-dusting agent or a colouring or odoriferous substance added to facilitate their identification or for safety reasons, provided the additions do not render the product particularly suitable for specific use rather than for general use;

   (h) the following products, diluted to standard strengths, for the production of azo dyes: diazonium salts, couplers used for these salts and diazotisable amines and their salts.

2. This Chapter does not cover the following:

   (a) goods of heading 15.04 or crude glycerol of heading 15.20;

   (b) ethyl alcohol (heading 22.07 or 22.08);

   (c) methane or propane (heading 27.11);

   (d) the compounds of carbon mentioned in Note 2 to Chapter 28;

   (e) urea (heading 31.02 or 31.05);

   (f) colouring matter of vegetable or animal origin (heading 32.03), synthetic organic colouring matter, synthetic organic products of a kind used as fluorescent brightening agents or as luminophores (heading 32.04) or dyes or other colouring matter put up in forms or packings for retail sale (heading 32.12);

   (g) enzymes (heading 35 07);

   (h) metaldehyde, hexamethylenetetramine or similar substances, put up in forms (for example, tablets, sticks or similar forms) for use as fuels, or liquid or liquefied-gas fuels in containers of a kind used for filling or refilling cigarette or similar lighters and of a capacity not exceeding 300 cm³ (heading 36.06);

   (ij) products put up as charges for fire-extinguishers or put up in fire-extinguishing grenades, of heading 38.13; ink removers put up in packings for retail sale, of heading 38.24; or

   (k) optical elements, for example, of ethylenediamine tartrate (heading 90 01).

3. Goods which could be included in two or more of the headings of this Chapter are to be classified in that one of those headings which occurs last in numerical order.

4. In headings 29.04 to 29.06, 29.08 to 29.11 and 29.13 to 29.20, any reference to halogenated, sulphonated, nitrated or nitrosated derivatives includes a reference to compound derivatives, such as sulphohalogenated, nitrohalogenated, nitrosulphonated or nitrosulphohalogenated derivatives.
   Nitro or nitroso groups are not to be taken as "nitrogen-functions" for the purposes of heading 29.29.

   For the purposes of headings 29.11, 29.12, 29.14, 29.18 and 29.22, "oxygen-function" is to be restricted to the functions (the characteristic organic oxygen-containing groups) referred to in headings 29.05 to 29.20.

5.

(A) The esters of acid-function organic compounds of sub-chapters I to VII with organic compounds of these sub-chapters are to be classified with that compound which is classified in the heading which occurs last in numerical order in these sub-chapters.

(B) Esters of ethyl alcohol with acid-function organic compounds of sub-chapters I to VII are to be classified in the same heading as the corresponding acid-function compounds.

(C) Subject to Note 1 to Section VI and Note 2 to Chapter 28:

(i) inorganic salts of organic compounds such as acid-, phenol- or enol-function compounds or organic bases, of sub-chapters I to X or heading 29.42, are to be classified in the heading appropriate to the organic compound;

(ii) salts formed between organic compounds of sub-chapters I to X or heading 29.42 are to be classified in the heading appropriate to the base or to the acid (including phenol- or enol-function compounds) from which they are formed, whichever occurs last in numerical order in the Chapter; and

(iii) co-ordination compounds, other than products classifiable in sub-Chapter XI or heading 29.41, are to be classified in the heading which occurs last in numerical order in Chapter 29, among those appropriate to the fragments formed by "cleaving" of all metal bonds, other than metal-carbon bonds.

(D) Metal alcoholates are to be classified in the same heading as the corresponding alcohols except in the case of ethanol (heading 29.05).

(E) Halides of carboxylic acids are to be classified in the same heading as the corresponding acids.

6. The compounds of headings 29.30 and 29.31 are organic compounds the molecules of which contain, in addition to atoms of hydrogen, oxygen or nitrogen, atoms of other non-metals or of metals (such as sulphur, arsenic or lead) directly linked to carbon atoms.
Heading 29.30 (organo-sulphur compounds) and heading 29.31 (other organo-inorganic compounds) do not include sulphonated or halogenated derivatives (including compound derivatives) which, apart from hydrogen, oxygen and nitrogen, only have directly linked to carbon the atoms of sulphur or of a halogen which give them their nature of sulphonated or halogenated derivatives (or compound derivatives).

7. Headings 29.32, 29.33 and 29.34 do not include epoxides with a three-membered ring, ketone peroxides, cyclic polymers of aldehydes or of thioaldehydes, anhydrides of polybasic carboxylic acids, cyclic esters of polyhydric alcohols or phenols with polybasic acids, or imides of polybasic acids.
These provisions apply only when the ring-position hetero-atoms are hose resulting solely from the cyclising function or functions here listed.

8. For the purposes of heading 29.37:

(a) the term "hormones" includes hormone-releasing or hormone-stimulating factors, hormone inhibitors and hormone antagonists (anti-hormones);

(b) the expression "used primarily as hormones" applies not only to hormone derivatives and structural analogues used primarily for their hormonal effect, but also to those derivatives and structural analogues used primarily as intermediates in the synthesis of products of this heading.

SUBHEADING NOTES:

1. Within any one heading of this Chapter, derivatives of a chemical compound (or group of chemical compounds) are to be classified in the same subheading as that compound (or group of compounds) provided that they are not more specifically covered by any other subheading and that there is no residual subheading named "Other" in the series of subheadings concerned.
2. Note 3 to Chapter 29 does not apply to the subheadings of this Chapter.

CHAPTER: 38

MISCELLANEOUS CHEMICAL PRODUCTS

NOTES:

1. This Chapter does not cover the following:

   (a) Separate chemically defined elements or compounds with the exception of the following:

      (1) artificial graphite (heading 38.01);

      (2) insecticides, rodenticides, fungicides, herbicides, anti-sprouting products and plant-growth regulators, disinfectants and similar products, put up as described in heading 38.08;

      (3) products put up as charges for fire-extinguishers or put up in fire-extinguishing grenades (heading 38.13);

      (4) certified reference materials specified in Note 2 below;

      (5) products specified in Note 3(a) or 3(c) below;

   (b) mixtures of chemicals with foodstuffs or other substances with nutritive value, of a kind used in the preparation of human foodstuffs (generally heading 21.06);

   (c) slag, ash and residues (including sludges but excluding sewage sludge), containing metals, arsenic or their mixtures and meeting the requirements of Note 3(a) or 3(b) to Chapter 26 (heading 26.20);

   (d) medicaments (heading 30.03 or 30.04); or

   (e) spent catalysts of a kind used for the extraction of base metals or for the manufacture of chemical compounds of base metals (heading 26.20), spent catalysts of a kind used principally for the recovery of precious metal (heading 71.12) or catalysts consisting of metals or metal alloys in the form of, for example, finely devided powder or woven gauze (Section XIV or XV).

2. (A) For the purposes of heading 38.22, the expression "certified reference materials" means reference materials which are accompnied by a certificate which indicates the values of the certified properties, he methods used to determine these values and the degree of certainty associated with each value and which are suitable for analytical, calibrating or referencing purposes.

   (B) With the exception of the products of Chapter 28 or 29, for the classification of certified reference materials, heading 38.22 shall take precedence over any other heading in this Schedule.

3. Heading 38.24 includes the following goods which are not to be classified in any other heading of this Schedule:

   (a) cultured crystals (other than optical elements) weighing not less than 2,5 g each, of magnesium oxide or of the halides of the alkali or alkaline-earth metals;

   (b) fusel oil; Dippel's oil;

   (c) ink removers put up in packings for retail sale;

   (d) stencil correctors and other correcting fluids put up in packings for retail sale; and

   (e) ceramic firing testers, fusible (for example, Seger cones).

4. Throughout his Schedule, "municipal waste" means waste of a kind collected from households, hotels, restaurants, hospitals, shops, offices, etc., road and pavement sweepings, as well as construction and demolition waste. Municipal waste generally contains a large variety of materials such as plastics, rubber, wood paper, textiles, glass, metals, food materials, broken furniture and other damaged or discarded articles. The term "municipal waste", however, does not cover the following:

   (a) Individual materials or articles segregated from the waste, such as wastes of plastics, rubber, wood, paper, textiles, glass or metals and spent batteries which fall in their appropriate headings in this Schedule;

   (b) industrial waste;

   (c) waste pharmaceuticals, as defined in Note 4(k) to Chapter 30; or

   (d) clinical waste, as defined in Note 6(a) below.

5. For the purposes of heading 38.25, "sewage sludge" means sludge arising from urban effluent treatment plant and includes pre-treatment waste, scourings and unstabilised sludge. Stabilised sludge when suitable for use as fertilizer is excluded (Chapter 31).

6. For the purposes of heading 38.25, the expression "other wastes" applies to:

(a) clinical waste, that is, contaminated waste arising from medical research, diagnosis, treatment or other medical, surgical, dental or veterinary procedures, which often contain pathogens and pharmaceutical substances and require special disposal procedures (for example, soiled dressings, used gloves and used syringes);

(b) waste organic solvents;

(c) waste of metal pikling liquors, hydraulic fluids, brake fluids and anti-freezing fluids; and

(d) other wastes from chemical or allied indusries.

The expression "other wastes" does not, however, cover wastes which contain mainly petroleum oils or oils obtained from bituminous minerals (heading 27.10).

SUBHEADING NOTES:

1. Subheading 3808.50 covers only goods of heading 38.08, containing one or more of the following substances: aldrin (ISO); binapacryl (ISO); camphechlor (ISO) (toxaphene); captafol (ISO); chlordane (ISO); chlordimeform (ISO); chlorobenzilate (ISO); DDT(ISO) (clofenotane (INN), 1,1,1,-trichloro-2,2-bis(p-chlorophenyl)ethane); dieldrin (ISO, INN); dinoseb (ISO), its salts or its esters; ethylene dibromide (ISO) (1,2-dibromoethane); ethylene dichloride (ISO) (1,2-dichloroethane); fluoroacetamide (ISO); heptachlor (ISO); hexachlorobenzene (ISO); 1,2,3,4,5,6-hexachlorocyclohexane (HCH (ISO)), including lindane (ISO, INN); mercury compounds; methamidophos (ISO); monocrotophos (ISO); oxirane (ethylene oxide); parathion (ISO); parathion-me hyl (ISO) (methyl-parathion); pentachlororphenol (ISO); phosphamidon (ISO); 2,4,5-trichlorophenoxyacetic acid, its salts or its esters.
2. For the purposes of subheadings 3825.41 and 3825.49, "waste organic solvents" are wastes containing mainly organic solvents, not fit for further use as presented as primary products, whether or not intended for recovery of the solvents.

ADDITIONAL NOTES:

1(a) For the purposes of tariff subheading 3824.90.03, biodiesel is fuel that comprises of mono-alkyd methyl esters of long chain fatty acids derived from vegetable or animal fats and oils; which is

SECTION: VII

PLASTICS AND ARTICLES THEREOF; RUBBER AND ARTICLES THEREOF

NOTES:

1. Goods put up in sets consisting of two or more separate constituents, some or all of which fall in this Section and are intended to be mixed together to obtain a product of Section VI or VII, are to be classified in the heading appropriate to that product, provided that he constituents are:
   (a) having regard to the manner in which they are put up, clearly identifiable as being intended to be used together without first being repacked;
   (b) presented together; and
   (c) identifiable, whether by their nature or by the relative proportions in which they are present, as being complementary one to another.

2. Except for the goods of heading 39.18 or 39.19, plastics, rubber, and articles thereof, printed with motifs, characters or pictorial representations, which are not merely incidental to the primary use of the goods, fall in Chapter 49.

CHAPTER: 39

PLASTICS AND ARTICLES THEREOF

NOTES:

1. Throughout his Schedule the expression "plastics" means those materials of headings 39.01 to 39.14 which are or have been capable, either at he moment of polymerisation or at some subsequent stage, of being formed under external influence (usually heat and pressure, if necessary with a solvent or plasticiser) by moulding, casting, extruding, rolling or other process into shapes which are retained on the removal of the external influence.
Throughout his Schedule any reference to "plastics" also includes vulcanised fibre. The expression, however, does not apply to materials regarded as textile materials of Section XI.

2. This Chapter does not cover the following:

(a) lubricating preparations of heading 27.10 or 34.03;

(b) waxes of heading 27.12 or 34.04;

(c) separate chemically defined organic compounds (Chapter 29);

(d) heparin or its salts (heading 30.01);

(e) solutions (other than collodions) consisting of any of the products specified in headings 39.01 to 39.13 in volatile organic solvents when the mass of the solvent exceeds 50 per cent of the mass of the solution (heading 32.08); stamping foils of heading 32.12;

(f) organic surface-active agents or prepara ions of heading 34.02;

(g) run gums or ester gums (heading 38.06);

(h) prepared additives for mineral oils (including gasoline) or for other liquids used for the same purpose as mineral oils (heading 38.11);

(ij) prepared hydraulic fluids based on polyglycols, silicones or other polymers of Chapter 39 (heading 38.19);

(k) diagnostic or laboratory reagents on a backing of plastics (heading 38.22);

(l) synthetic rubber, as defined for the purposes of Chapter 40, or articles thereof;

(m) saddlery or harness (heading 42.01) or trunks, suitcases, handbags or other containers of heading 42.02;

(n) plaits, wickerwork or other articles of Chapter 46;

(o) wall coverings of heading 48.14;

(p) goods of Section XI (textiles and textile articles);

(q) ar icles of Section XII (for example, footwear, headgear, umbrellas, sun umbrellas, walking-sticks, whips, riding-crops or parts thereof);

(r) imitation jewellery of heading 71.17;

(s) ar icles of Section XVI (machines and mechanical or electrical appliances);

(t) parts of aircraft or vehicles of Section XVII;

(u) ar icles of Chapter 90 (for example, optical elements, spectacle frames, drawing instruments);

(v) ar icles of Chapter 91 (for example, clock or watch cases);

(w) ar icles of Chapter 92 (for example, musical instruments or parts thereof);

(x) ar icles of Chapter 94 (for example, furniture, lamps and lighting fittings, illuminated signs, prefabricated buildings);

(y) ar icles of Chapter 95 (for example, toys, games, sports requisites); or

(z) ar icles of Chapter 96 (for example, brushes, buttons, slide fasteners, combs, mouthpieces or stems for smoking pipes, cigarette-holders or the like, parts of vacuum flasks or the like, pens, propelling pencils).

3. Headings 39.01 to 39.11 apply only to goods of a kind produced by chemical synthesis, falling in the following categories:

(a) liquid synthetic polyolefins of which less than 60 per cent by volume distils at 300°C, after conversion to 1,013 millibars when a reduced-pressure distillation method is used (headings 39.01 and 39.02);

(b) resins, not highly polymerised, of the coumarone-indene type (heading 39.11);

(c) other synthetic polymers with an average of at least 5 monomer units;

(d) silicones (heading 39.10); or

(e) resols (heading 39.09) and other prepolymers.

4. The expression "copolymers" cover all polymers in which no single monomer unit contributes 95 per cet or more by mass to the total polymer content.

For the purposes of this Chapter, except where the context otherwise requires, copolymers (including co-polycondensates, co-polyaddition products, block copolymers and graft copolymers) and polymer blends are to be classified in the heading covering polymers of that comonomer unit which predominates by mass over every other single comonomer unit. For the purposes of this Note, constituent comonomers units of polymers falling in the same heading shall be taken together.
If no single comonomer unit predominates, copolymers or polymer blends, as the case may be, are to be classified in he heading which occurs last in numerical order among those which equally merit consideration.

5. Chemically modified polymers, that is those in which only appendages to the main polymer chain have been changed by chemical reaction, are to be classified in the heading appropriate to the unmodified polymer. This provision does not apply to graft copolymers.

6. In headings 39.01 to 39.14, the expression "primary forms" applies only to the following forms:

(a) Liquids and pastes, including dispersions (emulsions and suspensions) and solutions.

(b) Blocks of irregular shape, lumps, powders (including moulding powders), granules, flakes and similar bulk forms.

7. Heading 39.15 does not apply to waste, parings and scrap of a single thermoplastic material, transformed into primary forms (headings 39.01 to 39.14).

8. For the purposes of heading 39.17, the expression "tubes, pipes and hoses" means hollow products, whe her semi-manufactures or finished products, of a kind generally used for conveying, conducting or distributing gases or liquids (for example, ribbed garden hose, perforated tubes). This expression also includes sausage casings and other lay-flat tubing. However, except for the last-mentioned, those having an internal cross-section other than round, oval, rectangular (in which the length does not exceed 1,5 times the width) or in the shape of a regular polygon are not to be regarded as tubes, pipes and hoses but as profile shapes.

9. For the purposes of heading 39.18, the expression "wall or ceiling coverings of plastics" applies to products in rolls, of a width not less than 45 cm, suitable for wall or ceiling decoration, consisting of plastics fixed permanently on a backing of any material other than paper, the layer of plastics (on the face side) being grained, embossed, coloured, design-printed or otherwise decorated.

10. In headings 39.20 and 39.21, the expression "plates, sheets, film, foil and strip" applies only to plates, sheets, film, foil and strip (excluding those of Chapter 54) and to blocks of regular geometric shape, whether or not printed or otherwise surface-worked, uncut or cut into rectangles (including squares) but not further worked (even if when so cut they become articles ready for use).

11. Heading 39.25 applies only to the following articles, not being products covered by any of the earlier headings of Subchapter II:

(a) reservoirs, tanks (including septic tanks), vats and similar containers, of a capacity exceeding 300 litres;

(b) structural elements used, for example, in floors, walls or partitions, ceilings or roofs;

(c) gutters and fittings therefor;

(d) doors, windows and their frames and thresholds for doors;

(e) balconies, balustrades, fencing, gates and similar barriers;

(f) shutters, blinds (including venetian blinds) and similar articles and parts and fittings thereof;

(g) large-scale shelving for assembly and permanent installation, for example, in shops, workshops, warehouses;

(h) ornamental architectural features, for example, flutings, cupolas, dovecotes; and

(ij fittings and mountings intended for permanent installation in or on doors, windows, staircases, walls or other parts of buildings, for example, knobs, handles, hooks, brackets, towel rails, switch-plates and other protective plates.

SUBHEADING NOTES:

1. Within any one heading of this Chapter, polymers (including copolymers) and chemically modified polymers are to be classified according to the following provisions:

(a) Where there is a subheading named "Other" in the same series:

(1) The designation in a subheading of a polymer by the prefix "poly" (for example, polyethylene and polyamide-6,6) means that the constituent monomer unit or monomer untis of the named polymer taken together must contribute 95 per cent or more by mass of the total polymer content.
(2) The copolymers named in subheadings 3901.30, 3903.20, 3903.30 and 3904.30 are to be classified in those subheadings, provided that the comonomer units of the named copolymers contribute 95 per cent or more by mass of the total polymer content.
(3) Chemically modified polymers are to be classified in the subheading named "Other", provided that the chemically modified polymers are not more specifically covered by another subheading.
(4) Polymers not meeting (1), (2) and (3) above, are to be classified in the subheading, among the remaining subheadings in the series, covering polymers of that monomer unit which predominates by mass over every single comonomer unit. For this purpose, constituent monomer units of polymers falling in the same subheading shall be taken together. Only constituent comonomer units of the polymers in the series of subheadings under consideration are to be compared.

(b) Where there is no subheading named "Other" in the same series:

(1) Polymers are to be classified in the subheading covering polymers of that monomer unit which predominates by mass over every other single comonomer unit. For this purpose, constituent monomer units of polymers falling in the same subheading shall be taken together. Only the constituent comonomer units of the polymers in the series under consideration are to be compared.
(2) Chemically modified polymers are to be classified in the subheading appropriate to the unmodified polymer.

. Polymer blends are to be classified in the same subheading as polymers of the same monomer units in the same proportions.

2. For the purposes of subheading 3920.43, the term "plasticisers" includes secondary plasticisers.

ADDITIONAL NOTES:

1. For the purposes of headings 39.01 to 39.14 the word "powder" means products of which 90 per cent or more, by mass, passes through a sieve having a mesh aperture of 420 micrometres.

2. For the purposes of this Chapter the expression "heat shrinkable" has a bearing on products which at a temperature of 120°C have a shrinkage coefficient of 15 per cent or more.

CHAPTER: 40

RUBBER AND ARTICLES THEREOF

NOTES:

1. Except where the context otherwise requires, throughout this Schedule the expression "rubber" means the following products, whether or not vulcanised or hard: natural rubber, balata, gutta-percha, guayule, chicle and similar natural gums, synthetic rubber, factice derived from oils, and such substances reclaimed.
2. This Chapter does not cover the following:

   (a) goods of Section XI (textiles and textile articles);

   (b) footwear or parts thereof of Chapter 64;

   (c) headgear or parts thereof (including bathing caps) of Chapter 65;

   (d) mechanical or electrical appliances or parts thereof of Section XVI (including electrical goods of all kinds), of hard rubber;

   (e) ar icles of Chapter 90, 92, 94 or 96; or

   (f) ar icles of Chapter 95 (other than sports gloves, mittens and mitts and articles of headings 40.11 to 40.13).

3. In headings 40.01 to 40.03 and 40.05 the expression "primary forms" applies only to the following forms:

   (a) liquids and pastes (including latex, whether or not prevulcanised, and other dispersions and solutions);

   (b) blocks of irregular shape, lumps, bales, powders, granules, crumbs and similar bulk forms.

4. In Note 1 to this Chapter and in heading 40.02, the expression "synthetic rubber" applies to:

   (a) unsaturated synthetic substances which can be irreversibly transformed by vulcanisation with sulphur into non-thermoplastic substances which, at a temperature between 18°C and 29°C, will not break on being extended to three times their original length and will return, after being extended to twice their original length, within a period of five minutes, to a length not greater than one and a half times their original length. For the purposes of this test, substances necessary for the cross-linking, such as vulcanising activators or accelerators, may be added; the presence of substances as provided for by Note 5(B)(ii) and (iii) is also permitted. However, the presence of any substances not necessary for the cross-linking, such as extenders, plasticisers and fillers, is not permitted;

   (b) thioplasts (TM); and

   (c) natural rubber modified by graf ing or mixing with plastics, depolymerised natural rubber, mixtures of unsaturated synthetic substances with saturated synthetic high polymers provided all the above-mentioned products comply with the requirements concerning vulcanisa ion, elongation and recovery in (a) above.

5. .

   (A) Headings 40.01 and 40.02 do not apply to any rubber or mixture of rubbers which has been compounded, before or after coagulation, with:

      (i) vulcanising agents, accelerators, retarders or activators (other than those added for the preparation of pre-vulcanised rubber latex);

      (ii) pigments or other colouring matter, other than those added solely for the purpose of identification;

      (iii) plasticisers or extenders (except mineral oil in the case of oil-extended rubber), fillers, reinforcing agents, organic solvents or any other substances, except those permitted under (B);

   (B) The presence of the following substances in any rubber or mixture of rubbers shall not affect its classification in heading 40.01 or 40.02, as the case may be, provided that such rubber or mixture of rubbers retains its essential character as a raw material:

      (i) emulsifiers or anti-tack agents;

      (ii) small amount of breadown products of emulsifiers;

      (iii) very small amounts of the following: heat-sensitive agents (generally for obtaining thermosensitive rubber latexes), cationic surface-active agents (generally for obtaining electro-positive rubber latexes), antioxidants, coagulants, crumbling agents, freeze-resisting agents, peptisers, preservatives, stabilisers, viscosity-control agents, or similar special-purpose additives.

6. For the purposes of heading 40.04 the expression "waste, parings and scrap" means rubber waste, parings and scrap from the manufacture or working of rubber and rubber goods definitely not usable as such because of cutting-up, wear or other reasons.

7. Thread wholly of vulcanised rubber, of which any cross-sectional dimension exceeds 5 mm, is to be classified as strip, rods or profile shapes, of heading 40.08.

8. Heading 40.10 includes conveyor or transmission belts or belting of textile fabric impregnated, coated, covered or laminated with rubber or made from textile yarn or cord impregnated, coated, covered of sheathed with rubber.

9. In headings 40.01, 40.02, 40.03, 40.05 and 40.08, the expressions "plates", "sheets" and "strip" apply only to plates, sheets and strip and to blocks of regular geometric shape, uncut or simply cut to rectangular (including square) shape, whether or not having the character of articles and whether or not printed or otherwise surface-worked, but not otherwise cut to shape or further worked.
In heading 40.08 the expressions "rods" and "profile shapes" apply only to such products, whether or not cut to length or surface-worked but not otherwise worked.

When no one textile material predominates by mass, the goods are to be classified as if consisting wholly of that one textile material which is covered by the heading which occurs last in numerical order among those which equally merit consideration.

(B) For the purposes of the above rule:

(a) gimped horsehair yarn (heading 51.10) and metallised yarn (heading 56.05) are to be treated as a single textile material the mass of which is to be taken as the aggregate of the masses of its components; for he classification of woven fabrics, metal thread is to be regarded as a textile material;

Single yarn of nylon or other polyamides, or of polyesters .... 60 cN/tex

Multiple (folded) or cabled yarn of nylon or other polyamides, of polyesters .....53 cN/tex

Single, multiple (folded) or cable yarn of viscose rayon .... 27 cN/tex.

7. For the purposes of this Section, the expression "made up" means:

(a) cut o herwise than into squares or rectangles;

(b) produced in the finished state, ready for use (or merely needing separation by cutting dividing threads) without sewing or other working (for example, certain dusters, towels, table cloths, scarf squares, blankets);

(e) assembled by sewing, gumming or otherwise (excluding piece goods consisting of two or more lengths of identical material joined end to end and piece goods composed of two or more textiles assembled in layers, whe her or not padded);

(f) knitted or crocheted to shape, whether presented as separate items or in the form of a number of items in the length.

8. For the purposes of Chapters 50 to 60:

(a) Chapters 50 to 55 and 60 and, except where the context otherwise requires, Chapters 56 to 59 do not apply to goods made up within the meaning of Note 7 above; and

9. The woven fabrics of Chapters 50 to 55 include fabrics consisting of layers of parallel textile yarns superimposed on each other at acute or right angles. These layers are bonded at the intersections of the yarns by an adhesive or by thermal bonding.

10. Elastic products consisting of textile materials combined with rubber threads are classified in this Section.

11. For the purposes of this Section, the expression "impregnated" includes "dipped".

12. For the purposes of this Section, the expression "polyamides" includes "aramids".

13. For the purposes of this Section and, where applicable, hroughout the Nomenclature, the expression "elastomeric yarn" means filament yarn, including monofilament, of synthetic textile material, other than textured yarn, which does not break on being extended to three times its original length and which returns, after being extended to twice its original length, within a period of five minutes, to a length not greater than one and a half times its original length.

14. Unless the context otherwise requires, textile garments of different headings are to be classified in their own headings even if put up in sets for retail sale.

. For the purposes of this Note, the expression "textile garments" means garments of headings 61.01 to 61.14 and headings 62.01 to 62.11.

SUBHEADING NOTES:

1. In this Section and, where applicable, throughout this Schedule, the following expressions have the meanings hereby assigned to them:

(a) UNBLEACHED YARN:

Yarn which:

(i) has the natural colour of its constituent fibres and has not been bleached, dyed (whether or not in the mass) or printed; or

(ii) is of indeterminate colour ("grey yarn"), manufactured from garnetted stock.

Such yarn may have been treated with a colourless dressing or fugitive dye (which disappears after simple washing with soap) and, in the case of man-made fibres, treated in the mass with delustring agents (for example, titanium dioxide).

(b) BLEACHED YARN:

Yarn which:

(i) has undergone a bleaching process, is made of bleached fibres or, unless the context otherwise requires, has been dyed white (whether or not in the mass) or treated with a white dressing;

(ii) consists of a mixture of unbleached and bleached fibres; or

(iii) is multiple (folded) or cabled and consists of unbleached and bleached yarns.

(c) COLOURED (DYED OR PRINTED) YARN

Yarn which:

(i) is dyed (whether or not in the mass) (excluding white or in a fugitive colour), or printed or made from dyed or printed fibres;

(ii) consists of a mixture of dyed fibres of different colours or of a mixture of unbleached or bleached fibres with coloured fibres (marl or mixture yarns), or is printed in one or more colours at intervals to give the impression of dots;

(iii) is obtained from slivers or rovings which have been printed, or

(iv) is multiple (folded) or cabled and consists of unbleached or bleached yarn and coloured yarn.

The above definitions also apply, MUTATIS MUTANDIS, to monofilament and to strip or the like of Chapter 54.

(d) UNBLEACHED WOVEN FABRIC:

Woven fabric made from unbleached yarn and which has not been bleached, dyed or printed. Such fabric may have been treated with a colourless dressing or a fugitive dye.

(e) BLEACHED WOVEN FABRIC:

Woven fabric which:

(i) has been bleached or, unless the context otherwise requires, dyed white or treated with a white dressing, in the piece;

(ii) consists of bleached yarn; or

(iii) consists of unbleached and bleached yarn.

(f) DYED WOVEN FABRIC:

Woven fabric which:

(i) is dyed a single uniform colour (excluding white) (unless the context otherwise requires) or has been treated with a coloured finish (excluding white) (unless the context otherwise requires), in the piece; or
(ii) consists of coloured yarn of a single uniform colour.

(g) WOVEN FABRIC OF YARNS OF DIFFERENT COLOURS:

Woven fabric (excluding printed woven fabric) which:

(i) consist of yarns of different colours or yarns of different shades of the same colour (excluding the natural colour of the constituent fibres);

(ii) consists of unbleached or bleached yarn and coloured yarn; or

(iii) consists of marl or mixture yarns.

(In all cases, the yarn used in selvedges and piece ends is not taken into consideration.)

(h) PRINTED WOVEN FABRIC:

Woven fabric which has been printed in the piece, whether or not made from yarns of different colours.

(The following are also regarded as printed woven fabrics: woven fabrics bearing designs made, for example, with a brush or spray gun, by means of transfer paper, by flocking or by the batik process.)
The process of mercerisation does not affect the classification of yarns or fabrics within the above categories.

The definitions at (g) to (h) apply, MUTATIS MUTANDIS, to knitted or crocheted fabrics.

(ij) PLAIN WEAVE:

A fabric construction in which each yarn of the weft passes alternately over and under successive yarns of the warp and each yarn of the warp passes alternately over and under successive yarns of the weft.

2. .

(A) Products of Chapters 56 to 63 containing two or more textile materials are to be regarded as consisting wholly of that textile material which would be selected under Note 2 to this Section for the classification of a product of Chapters 50 to 55 or of heading 58.09 consisting of the same textile materials.
(B) For the application of this rule:

(a) where appropriate, only the part which determines the classification under General Note A.3. shall be taken into account;

(b) in the case of textile products consisting of a ground fabric and a pile or looped surface no account shall be taken of the ground fabric;

(c) in the case of embroidery of heading 58.10 and goods thereof, only the ground fabric shall be taken into account. However, embroidery without visible ground, and goods thereof, shall be classified with reference to the embroidering threads alone.

CHAPTER: 54

MAN-MADE FILAMENTS; STRIP AND THE LIKE OF MAN-MADE TEXTILE MATERIALS

NOTES:

1. Throughout his Schedule, the term "man-made fibres" means staple fibres and filaments of organic polymers produced by manufacturing processes, either:

   (a) by polymerisation of organic monomers to produce polymers such as polyamides, polyesters, polyolefins or polyurethanes, or by chemical modification of polymers produced by this process (for example, poly(vinyl alcohol) prepared by the hydrolysis of poly(vinyl acetate); or

   (b) by dissolution of chemical treatment of natural organic polymers (for example, cellulose) to produce polymers such as cuprammonium rayon (cupro) or viscose rayon, or by chemical modification of natural organic polymers (for example, cellulose, casein and other proteins, or algiric acid), to produce polymers such as cellulose acetate or alginates.

   The terms "synthetic" and "artificial", used in relation to fibres, mean: synthetic: fibres as defined at (a); artificial: fibres as defined at (b). Strip and the like of heading 54.04 or 54.05 are not considered to be man-made fibres.

   The terms "man-made", "synthetic" and "artificial" shall have the same meanings when used in relation to "textile materials".

2. Headings 54.02 and 54.03 do not apply to synthetic or artificial filament tow of Chapter 55.

MAN-MADE STAPLE FIBRES

NOTES:

1. Headings 55.01 and 55.02 apply only to man-made filament tow, consisting of parallel filaments of a uniform length equal to the length of the tow, meeting the following specifications:

   (a) length of tow exceeding 2 m;

   (b) twist less than 5 turns/m;

   (c) measuring per filament less than 67 dtex;

   (d) synthetic filament tow only: the tow must be drawn, that is to say, be incapable of being stretched by more than 100 per cent of its length;

   (e) total measurement of tow more than 20 000 dtex.

   Tow of a length not exceeding 2 m is to be classified in heading 55.03 or 55.04.

CHAPTER: 56

WADDING, FELT AND NONWOVENS; SPECIAL YARNS; TWINE, CORDAGE, ROPES AND CABLES AND ARTICLES THEREOF

NOTES:

1. This Chapter does not cover the following:

   (a) wadding, felt or non-wovens, impregnated, coated or covered with substances or preparations (for example, perfumes or cosmetics of Chapter 33, soaps or detergents of heading 34.01, polishes, creams or similar preparations of heading 34.05, fabric softeners of heading 38.09) where the textile material is present merely as a carrying medium;

   (b) textile products of heading 58.11;

   (c) natural or artificial abrasive powder or grain, on a backing of felt or nonwovens (heading 68.05);

   (d) agglomerated or reconstituted mica, on a backing of felt or nonwovens (heading 68.14); or

   (e) metal foil on a backing of felt or nonwovens (generally Section XIV or XV).

2. The term "felt" includes needleloom felt and fabrics consisting of a web of textile fibres the cohesion of which has been enhanced by a stitch-bonding process using fibres from the web itself.

3. Headings 56.02 and 56.03 cover respectively felt and nonwovens, impregnated, coated, covered or laminated with plastics or rubber whatever the nature of these materials (compact or cellular).

   Heading 56.03 also includes nonwovens in which plastics or rubber forms the bonding substance.

   Headings 56.02 and 56.03 do not, however, cover the following:

   (a) felt impregnated, coated, covered or laminated with plastics or rubber, containing 50 per cent or less by mass of textile material or felt completely embedded in plastics or rubber (Chapter 39 or 40);

   (b) nonwovens, either completely embedded in plastics or rubber, or entirely coated or covered on both sides with such materials, provided such coating or covering can be seen with the naked eye with no account being taken of any resulting change of colour (Chapter 39 or 40); or

   (c) plates, sheets or strip of cellular plastics or cellular rubber combined with felt or nonwovens, where the textile material is present merely for reinforcing purposes (Chapter 39 or 40).

4. Heading 56.04 does not cover textile yarn, or strip or the like of heading 54.04 or 54.05, in which the impregnation, coating or covering cannot be seen with the naked eye (usually Chapters 50 to 55); for the purpose of this provision, no account should be taken of any resulting change of colour.

CARPETS AND OTHER TEXTILE FLOOR COVERINGS

NOTES:

1. For the purposes of this Chapter, the term "carpets and other textile floor coverings" means floor coverings in which textile materials serve as the exposed surface of the article when in use and includes articles having the characteristics of textile floor coverings but intended for use for other purposes.
2. This Chapter does not cover floor covering underlays.

NOTES:

1. This Chapter does not apply to textile fabrics referred to in Note 1 to Chapter 59, impregnated, coated, covered or laminated, or to other goods of Chapter 59.

2. Heading 58.01 also includes woven weft pile fabrics which have not yet had the floats cut, at which stage they have no pile standing up.

3. For the purposes of heading 58.03, "gauze" means a fabric with a warp composed wholly or in part of standing or ground threads and crossing or doup threads which cross the standing or ground threads making a half turn, a complete turn or more to form loops through which weft threads pass.

4. Heading 58.04 does not apply to knotted net fabrics of twine, cordage or rope, of heading 56.08.

5. For the purposes of heading 58.06, the expression "narrow woven fabrics" means:

   (a) woven fabrics of a width not exceeding 30 cm, whether woven as such or cut from wider pieces, provided with selvedges (woven, gummed or otherwise made) on both edges;

   (b) tubular woven fabrics of a flattened width not exceeding 30 cm; and

   (c) bias binding with folded edges, of a width when unfolded not exceeding 30 cm.

   Narrow woven fabrics with woven fringes are to be classified in heading 58.08.

6. In heading 58.10, the expression "embroidery" means, INTER ALIA, embroidery with metal or glass thread on a visible ground of textile fabric, and sewn appliqué work of sequins, beads or ornamental motifs of textile or other materials. The heading does not apply to needlework tapestry (heading 58.05).

7. In addition to the products of heading 58.09, this Chapter also includes articles made of metal thread and of a kind used in apparel, as furnishing fabrics or for similar purposes.

CHAPTER: 59

IMPREGNATED, COATED, COVERED OR LAMINATED TEXTILE FABRICS; TEXTILE ARTICLES OF A KIND SUITABLE FOR INDUSTRIAL USE

NOTES:

1. Except where the context otherwise requires, for the purposes of this Chapter the expression "textile fabrics" applies only to the woven fabrics of Chapters 50 to 55 and headings 58.03 and 58.06, the braids and ornamental trimmings in the piece of heading 58.08 and the knitted or crocheted fabrics of heading 60.02 to 60.06.
2. Heading 59.03 applies to:

   (a) textile fabrics, impregnated, coated, covered or laminated with plastics, whatever the mass per square metre and whatever the nature of the plastic material (compact or cellular) excluding:

      (1) fabrics in which the impregnation, coating or covering cannot be seen with the naked eye (usually Chapters 50 to 55, 58 or 60); for the purpose of this provision, no account should be taken of any resulting change of colour;
      (2) products which cannot, without fracturing, be bent manually around a cylinder of a diameter of 7 mm, at a temperature between 15°C and 30°C (usually Chapter 39);
      (3) products in which the textile fabric is either completely embedded in plastics or entirely coated or covered on both sides with such material, provided that such coating or covering can be seen with the naked eye with no account being taken of any resulting change of colour (Chapter 39);
      (4) fabrics partially coated or partially covered with plastics and bearing designs resulting from these treatments (usually Chapters 50 to 55, 58 or 60);

      (5) plates, sheets or strip of cellular plastics, combined with textile fabric, where the textile fabric is present merely for reinforcing purposes (Chapter 39); or

      (6) textile products of heading 58.11;

   (b) fabrics made from yarn, strip or the like, impregnated, coated, covered or sheathed with plastics, of heading 56.04.

3. For the purposes of heading 59.05, the expression "textile wall coverings" applies to products in rolls, of a width of not less than 45 cm, suitable for wall or ceiling decoration, consisting of a textile surface which has been fixed on a backing or has been treated on the back (impregnated or coated to permit pasting).
   This heading does not, however, apply to wall coverings consisting of textile flock or dust fixed directly on a backing of paper (heading 48.14) or on a textile backing (generally heading 59.07).

4. For the purposes of heading 59.06, the expression "rubberised textile fabrics" means:

   (a) textile fabrics impregnated, coated, covered or laminated wi h rubber,

      (i) of a mass of not more than 1 500 g/m²; or

      (ii) of a mass of more than 1 500 g/m² and containing more than 50 per cent by mass of textile material;

   (b) fabrics made from yarn, strip or the like, impregnated, coated, covered or sheathed with rubber, of heading 56.04; and

   (c) fabrics composed of parallel textile yarns agglomerated with rubber, irrespective of their mass per square metre.

   This heading does not, however, apply to plates, sheets or strips of cellular rubber, combined with textile fabric, where the textile fabric is present merely for reinforcing purposes (Chapter 40), or textile products of heading 58.11.
5. Heading 59.07 does not apply to the following:

   (a) fabrics in which the impregnation, coating or covering cannot be seen with the naked eye (usually Chapters 50 to 55, 58 or 60); for the purpose of this provision, no account should be taken of any resulting change of colour;
   (b) fabrics painted with designs (excluding painted canvas being theatrical scenery, studio back-cloths or the like);

   (c) fabrics partially covered with flock, dust, powdered cork or the like and bearing designs resulting from these treatments; however, imitation pile fabrics remain classified in this heading;

   (d) fabrics finished with normal dressings having a basis of amylaceous or similar substances;

   (e) wood veneered on a backing of textile fabrics (heading 44.08);

(f) natural or artificial abrasive powder or grain, on a backing of textile fabrics (heading 68.05);

(g) agglomerated or reconstituted mica, on a backing of textile fabrics (heading 68.14); or

(h) metal foil on a backing of textile fabrics (generally Section XIV or XV).

6. Heading 59.10 does not apply to the following:

(a) transmission or conveyor belting, of textile material, of a thickness of less than 3 mm; or

(b) transmission or conveyor belts or belting of textile fabric impregnated, coated, covered or laminated with rubber or made from textile yarn or cord impregnated, coated, covered or sheathed with rubber (heading 40.10).

7. Heading 59.11 applies to the following goods, which do not fall in any o her heading of Sec ion XI:

(a) textile products in the piece, cut to length or simply cut to rectangular (including square) shape (excluding those having the character of the products of heading 59.08 to 59.10), the following only:

(i) textile fabrics, felt and felt-lined woven fabrics, coated, covered or laminated with rubber, leather or other material, of a kind used for card clothing, and similar fabrics of a kind used for other technical purposes, including narrow fabrics made of velvet impregnated with rubber, for covering weaving spindles (weaving beams);

(ii) bolting cloth;

(iii) straining cloth of a kind used in oil presses or the like, of textile material or of human hair;

(iv) flat woven textile fabrics with multiple warp or weft, whether or not felted, impregnated or coated, of a kind used in machinery or for other technical purposes;

(v) textile fabrics reinforced with metal, of a kind used for technical purposes;

(vi) cords, braids and the like, whether or not coated, impregnated or reinforced with metal, of a kind used in industry as packing or lubricating materials;

(b) textile articles (excluding those of headings 59.08 to 59.10) of a kind used for technical purposes (for example, textile fabrics and felts, endless or fitted with linking devices, of a kind used in paper-making or similar machines (for example for pulp or asbestos-cement), gaskets, washers, polishing discs and other machinery parts).

CHAPTER: 61

ARTICLES OF APPAREL AND CLOTHING ACCESSORIES, KNITTED OR CROCHETED

NOTES:

1. This Chapter applies only to made up knitted or crocheted articles.

2. This Chapter does not cover the following:

   (a) goods of heading 62.12;

   (b) worn clothing or other worn articles of heading 63.09; or

   (c) or hopaedic appliances, surgical belts, trusses or the like (heading 90.21).

3. For the purposes of headings 61.03 and 61.04:

   (a) the term "suit" means a set of garments composed of two or three pieces made up, in respect of their outer surface, in identical fabric and comprising:

   - one suit coat or jacket the outer shell of which, exclusive of sleeves, consists of four or more panels, designed to cover the upper part of the body, possibly with a tailored waistcoat in addition whose front is made from the same fabric as the outer surface of the other components of the set and whose back is made from the same fabric as the lining of the suit coat or jacket; and
   - one garment designed to cover the lower part of the body and consisting of trousers, breeches or shorts (excluding swimwear), a skirt or a divided skirt, having neither braces nor bibs.

   All of the components of a "suit" must be of the same fabric construction, colour and composition; they must also be of the same style and of corresponding or compatible size. However, these components may have piping (a strip of fabric sewn into the seam) in a different fabric.
   If several separate components to cover the lower part of the body are presented together (for example, two pairs of trousers or trousers and shorts, or a skirt or divided skirt and trousers), the constituent lower part shall be one pair of trousers or, in the case of women's or girls' suits, the skirt or divided skirt, the other garments being considered separately.
   The term "suit" includes the following sets of garments, whether or not they fulfil all the above conditions:

   - morning dress, comprising a plain jacket (cutaway) with rounded tails hanging well down at the back and striped trousers;

   - evening dress (tailcoat), generally made of black fabric, the jacket of which is rela ively short at the front, does not close and has narrow skirts cut in at the hips and hanging down behind;

   - dinner jacket suits, in which the jacket is similar in style to an ordinary jacket (though perhaps revealing more of the shirt front), but has shiny silk or imitation silk lapels.

   (b) The term "ensemble" means a set of garments (excluding suits and articles of heading 61.07, 61.08 or 61.09), composed of several pieces made up in identical fabric, put up for retail sale, and comprising:
   - one garment designed to cover the upper part of the body, with the exception of pullovers which may form a second upper garment in the sole context of twin sets, and of waistcoats which may also form a second upper garment, and
   - one or two different garments, designed to cover the lower part of the body and consisting of trousers, bib and brace overalls, breeches, shorts (excluding swimwear), a skirt or a divided skirt.

   All of the components of an ensemble must be of the same fabric construction, style, colour and composition; they also must be of corresponding or compatible size. The term "ensemble" does not apply to track suits or ski suits, of heading 61.12.

4. Headings 61.05 and 61.06 do not cover garments with pockets below the waist, with a ribbed waistband or other means of tightening at the bottom of the garment, or garments having an average of less than 10 stitches per linear centimetre in each direction counted on an area measuring at least 10 cm x 10 cm. Heading 61.05 does not cover sleeveless garments.

5. Heading 61.09 does not cover garments with a drawstring, ribbed waistband or other means of tightening at the bottom of the garment.

6. For the purposes of heading 61.11:

   (a) the expression "babies' garments and clothing accessories" means articles for young children of a body height not exceeding 86 cm; it also covers babies' napkins;

   (b) ar icles which are, PRIMA FACIE, classifiable both in heading 61.11 and in other headings of this Chapter are to be classified in heading 61.11.

7. For the purposes of heading 61.12, "ski suits" means garments or sets of garments which, by their general appearance and texture, are identifiable as intended to be worn principally for skiing (cross-country or alpine). They consist either of:

(a) a "ski overall", that is, a one-piece garment designed to cover the upper and the lower parts of the body; in addition to sleeves and a collar the ski overall may have pockets or footstraps; or

(b) a "ski ensemble", that is, a set of garments composed of two or three pieces, put up for retail sale and comprising:

- one garment such as an anorak, wind-cheater, wind-jacket or similar article, closed by a slide fastener (zipper), possibly with a waistcoat in addition, and

- one pair of trousers whether or not extending above waist-level, one pair of breeches or one bib and brace overall.

The "ski ensemble" may also consist of an overall similar to the one mentioned in paragraph (a) above and a type of padded, sleeveless jacket worn over the overall.

All the components of a "ski ensemble" must be made up in a fabric of the same texture, style and composition whether or not of the same colour; they also must be of corresponding or compatible size.

8. Garments which are, PRIMA FACIE, classifiable both in heading 61.13 and in other headings of this Chapter, excluding heading 61.11, are to be classified in heading 61.13.

9. Garments of this Chapter designed for left over right closure at the front shall be regarded as men's or boys' garments, and those designed for right over left closure at the front as women's or girls' garments.
These provisions do not apply where the cut of the garment clearly indicates that it is designed for one or other of the sexes.
Garments which cannot be identified as either men's or boys' garments or as women's or girls' garments are to be classified in the headings covering women's or girls' garments.

10. Articles of this Chapter may be made of metal thread.

CHAPTER: 62

ARTICLES OF APPAREL AND CLOTHING ACCESSORIES, NOT KNITTED OR CROCHETED

NOTES:

1. This Chapter applies only to made up articles of any textile fabric except wadding, excluding knitted or crocheted articles (excluding those of heading 62.12).

2. This Chapter does not cover the following:

   (a) worn clothing or other worn articles of heading 63.09; or

   (b) or hopaedic appliances, surgical belts, trusses or the like (heading 90.21).

3. For the purposes of headings 62.03 and 62.04:

   (a) the term "suit" means a set of garments composed of two or three pieces made up, in respect of their outer surface, in identical fabric and comprising:

   - one suit coat or jacket the outer shell of which, exclusive of sleeves, consists of four or more panels, designed to cover the upper part of the body, possibly with a tailored waistcoat in addition whose front is made from the same fabric as the outer surface of the other components of the set and whose back is made from the same fabric as the lining of the suit coat or jacket; and
   - one garment designed to cover the lower part of the body and consisting of trousers, breeches or shorts (excluding swimwear), a skirt or a divided skirt, having neither braces nor bibs.

   All of the components of a "suit" must be of the same fabric construction, colour and composition; they must also be of the same style and of corresponding or compatible size. However, these components may have piping (a strip of fabric sewn into the seam) in a different fabric.
   If several separate components to cover the lower part of the body are presented together (for example, two pairs of trousers or trousers and shorts, or a skirt or divided skirt and trousers), the constituent lower part shall be one pair of trousers or, in the case of women's or girls' suits, the skirt or divided skirt, the other garments being considered separately.
   The term "suit" includes the following sets of garments, whether or not they fulfil all the above conditions:

   - morning dress, comprising a plain jacket (cutaway) with rounded tails hanging well down at the back and striped trousers;

   - evening dress (tailcoat), generally made of black fabric, the jacket of which is rela ively short at the front, does not close and has narrow skirts cut in at the hips and hanging down behind;

   - dinner jacket suits, in which the jacket is similar in style to an ordinary jacket (though perhaps revealing more of the shirt front), but has shiny silk or imitation silk lapels.

   (b) The term "ensemble" means a set of garments (excluding suits and articles of heading 62.07 or 62.08) composed of several pieces made up in identical fabric, put up for retail sale, and comprising:
   - one garment designed to cover the upper part of the body, with the exception of waistcoats which may also form a second upper garment, and

   - one or two different garments, designed to cover the lower part of the body and consisting of trousers, bib and brace overalls, breeches, shorts (excluding swimwear), a skirt or a divided skirt.

   All of the components of an ensemble must be of the same fabric construction, style, colour and composition; they also must be of corresponding or compatible size. The term "ensemble" does not apply to track suits or ski suits, of heading 62.11.

4. For the purposes of heading 62.09:

   (a) the expression "babies' garments and clothing accessories" means articles for young children of a body height not exceeding 86 cm; it also covers babies' napkins;

   (b) ar icles which are, PRIMA FACIE, classifiable both in heading 62.09 and in other headings of this Chapter are to be classified in heading 62.09.

5. Garments which are, PRIMA FACIE, classifiable both in heading 62.10 and in other headings of this Chapter, excluding heading 62.09, are to be classified in heading 62.10.

6. For the purposes of heading 62.11 "ski suits" means garments or sets of garments which, by their general appearance and texture, are identifiable as intended to be worn principally for skiing (cross-country or alpine). They consist either of:

   (a) a "ski overall", that is, a one-piece garment designed to cover the upper and the lower parts of the body; in addition to sleeves and a collar the ski overall may have pockets or footstraps; or

   (b) a "ski ensemble", that is, a set of garments composed of two or three pieces, put up for retail sale and comprising:

- one garment such as an anorak, wind-cheater, wind- jacket or similar article, closed by a slide fastener (zipper), possibly with a waistcoat in addition, and

- one pair of trousers whether or not extending above waist-level, one pair of breeches or one bib and brace overall.

The "ski ensemble" may also consist of an overall similar to the one mentioned in paragraph (a) above and a type of padded, sleeveless jacket worn over the overall.

All the components of a "ski ensemble" must be made up in a fabric of the same texture, style and composition whether or not of the same colour; they also must be of corresponding or compatible size.

7. Scarves and articles of the scarf type, square or approximately square, of which no side exceeds 60 cm, are to be classified as handkerchiefs (heading 62.13). Handkerchiefs of which any side exceeds 60 cm are to be classified in heading 62.14.

8. Garments of this Chapter designed for left over right closure at the front shall be regarded as mens' or boys' garments, and those designed for right over left closure at the front as women's or girls' garments. These provisions do not apply where the cut of the garment clearly indicates that it is designed for one or other of the sexes.
Garments which cannot be identified as either men's or boys' garments or as women's or girls' garments are to be classified in the headings covering women's or girls' garments.

9. Articles of this Chapter may be made of metal thread.

CHAPTER: 70

GLASS AND GLASSWARE

NOTES:

1. This Chapter does not cover the following:

   (a) goods of heading 32.07 (for example, vitrifiable enamels and glazes, glass frit, other glass in the form of powder, granules or flakes);

   (b) ar icles of Chapter 71 (for example, imitation jewellery);

   (c) optical fibre cables of heading 85.44, electrical insulators (heading 85.46) or fittings of insulating material of heading 85.47;

   (d) optical fibres, optically worked optical elements, hypodermic syringes, artificial eyes, thermometers, barometers, hydrometers or other articles of Chapter 90;

   (e) lamps and lighting fittings, illuminated signs, illuminated name-plates and the like, having a permanently fixed light source, or parts thereof of heading 94.05;

   (f) toys, games, sports requisites, Christmas tree ornaments or other articles of Chapter 95 (excluding glass eyes without mechanisms for dolls or for other articles of Chapter 95); or

   (g) buttons, fitted vacuum flasks, scent or similar sprays or other articles of Chapter 96.

2. For the purposes of headings 70.03, 70.04 and 70.05:

   (a) glass is not regarded as "worked" by reason of any process it has undergone before annealing;

   (b) cutting to shape does not affect he classification of glass in sheets;

   (c) the expression "absorbent, reflecting or non-reflecting layer" means a microscopically thin coa ing of metal or of a chemical compound (for example, metal oxide) which absorbs, for example, infra-red light or improves the reflecting qualities of the glass while still allowing it to retain a degree of transparency or translucency; or which prevents light from being reflected on the surface of the glass.

3. The products referred to in heading 70.06 remain classified in that heading whether or not they have the character of articles.

4. For the purposes of heading 70.19, the expression "glass wool" means:

   (a) mineral wools with a silica (SiO_2) content not less than 60 per cent by mass;

   (b) mineral wools with a silica (SiO_2) content less than 60 per cent but with an alkaline oxide (K_2O or Na_2O) content exceeding 5 per cent by mass or a boric oxide (B_2O_3) content exceeding 2 per cent by mass.

   Mineral wools which do not comply with the above specifications fall in heading 68.06.

5. Throughout his Schedule, the expression "glass" includes fused quartz and other fused silica.

SUBHEADING NOTES:

1. For the purposes of subheadings 7013.22, 7013.33, 7013.41 and 7013.91, the expression "lead crystal" means only glass having a minimum lead monoxide (PbO) content by mass of 24 per cent.

ADDITIONAL NOTES:

1. For the purposes of this Chapter, the expression "optical glass" means special glasses used in the manufacture of optical instruments for photography, astronomy, observation (for example, microscopy, navigation), armaments (for example, sighting telescopes), laboratories or for the manufacture of corrective spectacle lenses. These glasses are highly transparent. They may have special light absorptive properties and therefore be coloured or black. They are clear, homogeneous, without air bubbles, and have refractive indices and dispersive powers unusual in other glasses.

2. For the classification of ferro-alloys in the subheadings of heading No. 72.02 the following rule should be observed:

A ferro-alloy is considered as binary and classified under the relevant subheading (if it exists) if only one of the alloy elements exceeds the minimium percentage laid down in Chapter Note 1 (c); by analogy, it is considered respectively as ternary or quaternary if two or three alloy elements exceed the minimum percentage.
For the application of this rule the unspecified "other elements" referred to in Chapter Note 1 (c) must each exceed 10 per cent by mass.

CHAPTER: 73

ARTICLES OF IRON OR STEEL

NOTES:

1. In this Chapter the expresion "cast iron" applies to products obtained by cas ing in which iron predominates by mass over each of the other elements and which do not comply with the chemical composition of steel as defined in Note 1(d) to Chapter 72.
2. In this Chapter the word "wire" means hot or cold-formed products of any cross-sectional shape, of which no cross-sectional dimension exceeds 16 mm.

CHAPTER: 74

COPPER AND ARTICLES THEREOF

NOTES:

1. In this Chapter the following expressions have the meanings hereby assigned to them:

(a) REFINED COPPER:

Metal containing at least 99,85 per cent by mass of copper; or

metal containing at least 97,5 per cent by mass of copper, provided that the content by mass of any other element does not exceed the limit specified in the following table:

Element	Limiting Content percentage by mass
Ag - Silver	0,25
As - Arsenic	0,5
Cd - Cadmium	1,3
Cr - Chromium	1,4
Mg - Magnesium	0,8
Pb - Lead	1,5
S - Sulphur	0,7
Sn - Tin	0,8
Te - Tellurium	0,8
Zn - Zinc	1
Zr - Zirconium	0,3
Other elements*, each	0,3

* Other elements are for example: Al, Be, Co, Fe, Mn, Ni, Si.

(b) COPPER ALLOYS:

Metallic substances (excluding unrefined copper) in which copper predominates by mass over each of the other elements, provided:

(i) the content by mass of at least one of the other elements is greater than the limit specified in the foregoing table; or

(ii) the total content by mass of such other elements exceeds 2,5 per cent.

(c) MASTER ALLOYS:

Alloys containing with other elements more than 10 per cent by mass of copper, not usefully malleable and commonly used as an additive in the manufacture of other alloys or as de-oxidants, de-sulphurising agents or for similar uses in the metallurgy of non-ferrous metals. However, copper phosphide (phosphor copper) containing more than 15 per cent by mass of phosphorus falls in heading 28.48.

(d) BARS AND RODS:

Rolled, extruded, drawn or forged products, not in coils, which have a uniform solid cross-section along their whole length in the shape of circles, ovals, rectangles (including squares), equilateral triangles or regular convex polygons (including "flattened circles" and "modified rectangles", of which two opposite sides are convex arcs, the other two sides being straight, of equal length and parallel). Products wi h a rectangular (including square), triangular or polygonal cross-section may have corners rounded along their whole length. The thickness of such products which have a rectangular (including "modified rectangular") cross-section exceeds one-tenth of the width. The expression also covers cast or sintered products, of the same forms and dimensions, which have been subsequently worked after production (otherwise than by simple trimming or de-scaling), provided that they have not thereby assumed the character of articles or products of other headings. Wire-bars and billets with their ends tapered or otherwise worked simply to facilitate their entry into machines for converting them into, for example, drawing stock (wire-rod) or tubes, are however to be taken to be unwrought copper of heading 74.03.

(e) PROFILES:

Rolled, extruded, drawn, forged or formed products, coiled or not, of a uniform cross-section along their whole length, which do not conform to any of the definitions of bars, rods, wire, plates, sheets, strip, foil, tubes or pipes. The expression also covers cast or sintered products, of the same forms, which have been subsequently worked after production (otherwise than by simple trimming or de-scaling), provided that they have not thereby assumed the character of articles or products of other headings.

(f) WIRE:

Rolled, extruded or drawn products, in coils, which have a uniform solid cross-section along their whole length in the shape of circles, ovals, rectangles (including squares), equilateral triangles or regular convex polygons (including "flattened circles" and "modified rectangles", of which two opposite sides are convex arcs, the other two sides being straight, of equal length and parallel). Products with a rectangular (including square), triangular or polygonal cross-section may have corners rounded along their whole length. The thickness of such products which have a rectangular (including "modified rectangular") cross-section exceeds one-tenth of the width.

(g) PLATES, SHEETS, STRIP AND FOIL:

Flat-surfaced products (excluding the unwrought products of heading 74.03), coiled or not, of solid rectangular (excluding square) cross-section with or without rounded corners (including "modified rectangles" of which two opposite sides are convex arcs, the other two sides being straight, of equal length and parallel) of a uniform thickness, which are:

- of rectangular (including square) shape with a thickness not exceeding one-tenth of the width,
- of a shape (excluding rectangular or square), of any size, provided they do not assume the character of articles or products of other headings.

Headings 74.09 and 74.10 apply, INTER ALIA, to plates, sheets, strip and foil with patterns (for example, grooves, ribs, chequers, tears, buttons, lozenges) and to such products which have been perforated, corrugated, polished or coated, provided they do not thereby assume the character of articles or products of other headings.

(h) TUBES AND PIPES:

Hollow products, coiled or not, which have a uniform cross-section with only one enclosed void along their whole length in the shape of circles, ovals, rectangles (including squares), equilateral triangles or regular convex polygons, and which have a uniform wall thickness. Products with a rectangular (including square), equilateral triangular or regular convex polygonal cross-section, which may have corners rounded along their whole length, are also to be taken to be tubes and pipes provided the inner and outer cross-sections are concentric and have the same form and orientation. Tubes and pipes of the foregoing cross-sections may be polished, coated, bent, threaded, drilled, waisted, expanded, cone-shaped or fitted with flanges, collars or rings.

SUBHEADING NOTES:

1. In this Chapter the following expressions have the meanings hereby assigned to them:

(a) COPPER-ZINC BASE ALLOYS (BRASSES):

Alloys of copper and zinc, with or without other elements. When other elements are present:

- zinc predominates by mass over each of such other elements;
- any nickel content by mass is less than 5 per cent (see copper-nickel-zinc alloys (nickel silvers)); and
- any tin content by mass is less than 3 per cent (see copper-tin alloys (bronzes).

(b) COPPER-TIN BASE ALLOYS (BRONZES):

Alloys of copper and tin, with or without other elements. When other elements are present, tin predominates by mass over each of such other elements, except that when the tin content is 3 per cent or more the zinc content by mass may exceed that of tin but must be less than 10 per cent.

(c) COPPER-NICKEL-ZINC BASE ALLOYS (NICKEL SILVERS):

Alloys of copper, nickel and zinc, with or without other elements. The nickel content is 5 per cent or more by mass (see copper-zinc alloys (brasses)).

(d) COPPER-NICKEL BASE ALLOYS:

Alloys of copper and nickel, with or without other elements but in any case containing by mass not more than 1 per cent of zinc. When other elements are present, nickel predominates by mass over each of such other elements.

CHAPTER: 75

NICKEL AND ARTICLES THEREOF

NOTES:

1. In this Chapter the following expressions have the meanings hereby assigned to them:

(a) BARS AND RODS:

Rolled, extruded, drawn or forged products, not in coils, which have a uniform solid cross-section along their whole length in the shape of circles, ovals, rectangles (including squares), equilateral triangles or regular convex polygons (including "flattened circles" and "modified rectangles", of which two opposite sides are convex arcs, the other two sides being straight, of equal length and parallel). Products wi h a rectangular (including square), triangular or polygonal cross-section may have corners rounded along their whole length. The thickness of such products which have a rectangular (including "modified-rectangular") cross-section exceeds one-tenth of the width. The expression also covers cast or sintered products, of the same forms and dimensions, which have been subsequently worked after production (otherwise than by simple trimming or de-scaling), provided that they have not thereby assumed the character of articles or products of other headings.

(b) PROFILES:

Rolled, extruded, drawn, forged or formed products, coiled or not, of a uniform cross-section along their whole length, which do not conform to any of the definitions of bars, rods, wire, plates, sheets, strip, foil, tubes or pipes. The expression also covers cast or sintered products, of the same forms, which have been subsequently worked after production (otherwise than by simple trimming or de-scaling), provided they have not thereby assumed the character of articles or products of other headings.

(c) WIRE:

Rolled, extruded or drawn products, in coils, which have a uniform solid cross-section along their whole length in the shape of circles, ovals, rectangles (including squares), equilateral triangles or regular convex polygons (including "flattened circles" and "modified rectangles", of which two opposite sides are convex arcs, the other two sides being straight, of equal length and parallel). Products with a rectangular (including square), triangular or polygonal cross-section may have corners rounded along their whole length. The thickness of such products which have a rectangular (including "modified rectangular") cross-section exceeds one-tenth of the width.

(d) PLATES, SHEETS, STRIP AND FOIL:

Flat-surfaced products (excluding the unwrought products of heading 75.02), coiled or not, of solid rectangular (excluding square) cross-section with or without rounded corners (including "modified rectangles" of which two opposite sides are convex arcs, the other two sides being straight, of equal length and parallel) of a uniform thickness, which are:

- of rectangular (including square) shape with a thickness not exceeding one-tenth of the width,
- of a shape (excluding rectangular or square), of any size, provided that they do not assume the character of articles or products of other headings.

Heading 75.06 applies, INTER ALIA, to plates, sheets, strip and foil wi h patterns (for example, grooves, ribs, chequers, tears, buttons, lozenges) and to such products which have been perforated, corrugated, polished or coated, provided they do not thereby assume the character of articles or products of other headings.

(e) TUBES AND PIPES:

Hollow products, coiled or not, which have a uniform cross-section with only one enclosed void along their whole length in the shape of circles, ovals, rectangles (including squares), equilateral triangles or regular convex polygons, and which have a uniform wall thickness. Products with a rectangular (including square), equilateral triangular, or regular convex polygonal cross-section, which may have corners rounded along their whole length, are also to be considered as tubes and pipes provided the inner and outer cross-sections are concentric and have the same form and orientation. Tubes and pipes of the foregoing cross-sections may be polished, coated, bent, threaded, drilled, waisted, expanded, cone-shaped or fitted with flanges, collars or rings.

SUBHEADING NOTES:

1. In this Chapter the following expressions have the meanings hereby assigned to them:

(i) the cobalt content by mass does not exceed 1,5 per cent, and

(ii) the content by mass of any other element does not exceed the limit specified in the following table:

_____

Element	Limiting content percentage by mass
Fe - Iron	0,5
O - Oxygen	0,4
Other elements, each	0,3

(b) NICKEL ALLOYS:

(i) the content by mass of cobalt exceeds 1,5 per cent,

(ii) the content by mass of at least one of the other elements is greater than the limit specified in the foregoing table, or

(iii) the total content by mass of elements (excluding nickel plus cobalt) exceeds 1 per cent.

2. Notwithstanding the provisions of Chapter Note 1(c), for the purposes of subheading 7508.10 the term "wire" applies only to products, whether or not in coils,of any cross-sectional shape, of which no cross-sectional dimension exceeds 6 mm.

LEAD AND ARTICLES THEREOF

NOTES:

1. In this Chapter the following expressions have the meanings hereby assigned to them:

(a) BARS AND RODS:

Rolled, extruded, drawn or forged products, not in coils, which have a uniform solid cross-section along their whole length in the shape of circles, ovals, rectangles (including squares), equilateral triangles or regular convex polygons (including "flattened circles" and "modified rectangles", of which two opposite sides are convex arcs, the other two sides being straight, of equal length and parallel). Products wi h a rectangular (including square), triangular or polygonal cross-section may have corners rounded along their whole length. The thickness of such products which have a rectangular (including "modified-rectangular") cross-section exceeds one-tenth of the width. The expression also covers cast or sintered products, of the same forms and dimensions, which have been subsequently worked after production (otherwise than by simple trimming or de-scaling), provided they have not thereby assumed the character of articles or products of other headings.

(b) PROFILES:

Rolled, extruded, drawn, forged or formed products, coiled or not, of a uniform cross-section along their whole length, which do not conform to any of the definitions of bars, rods, wire, plates, sheets, strip, foil, tubes or pipes. The expression also covers cast or sintered products, of the same forms, which have been subsequently worked after production (otherwise than by simple trimming or de-scaling), provided that they have not thereby assumed the character of articles or products of other headings.

(c) WIRE:

Rolled, extruded or drawn products, in coils, which have a uniform solid cross-section along their whole length in the shape of circles, ovals, rectangles (including squares), equilateral triangles or regular convex polygons (including "flattened circles" and "modified rectangles", of which two opposite sides are convex arcs, the other two sides being straight, of equal length and parallel). Products with a rectangular (including square), triangular or polygonal cross-section may have corners rounded along their whole length. The thickness of such products which have a rectangular (including "modified rectangular") cross-section exceeds one-tenth of the width.

(d) PLATES, SHEETS, STRIP AND FOIL:

Flat-surfaced products (excluding the unwrought products of heading 78.01), coiled or not, of solid rectangular (excluding square) cross-section with or without rounded corners (including "modified rectangles" of which two opposite sides are convex arcs, the other two sides being straight, of equal length and parallel) of a uniform thickness, which are:

- of rectangular (including square) shape with a thickness not exceeding one-tenth of the width,

- of a shape (excluding rectangular or square), of any size, provided they do not assume the character of articles or products of other headings.

Heading 78.04 applies, INTER ALIA, to plates, sheets, strip and foil wi h patterns (for example, grooves, ribs, chequers, tears, buttons, lozenges) and to such products which have been perforated, corrugated, polished or coated, provided they do not thereby assume the character of articles or products of other headings.

(e) TUBES AND PIPES:

Hollow products, coiled or not, which have a uniform cross-section with only one enclosed void along their whole length in the shape of circles, ovals, rectangles (including squares), equilateral triangles or regular convex polygons, and which have a uniform wall thickness. Products with a rectangular (including square), equilateral triangular or regular convex polygonal cross-section, which may have corners rounded along their whole length, are also to be considered as tubes and pipes provided the inner and outer cross-sections are concentric and have the same form and orientation. Tubes and pipes of the foregoing cross-sections may be polished, coated, bent, threaded, drilled, waisted, expanded, cone-shaped or fitted with flanges, collars or rings.

CHAPTER: 85

ELECTRICAL MACHINERY AND EQUIPMENT AND PARTS THEREOF; SOUND RECORDERS AND REPRODUCERS, TELEVISION IMAGE AND SOUND RECORDERS AND REPRODUCERS, AND PARTS AND ACCESSORIES OF SUCH ARTICLES

NOTES:

1. This Chapter does not cover the following:

   (a) electrically warmed blankets, bed pads, foot-muffs or the like; electrically warmed clothing, footwear or ear pads or other electrically warmed articles on or about the person;

   (b) ar icles of glass of heading 70.11;

   (c) machines and apparatus of heading 84.86;

   (d) vacuum apparatus of a kind used in medical, surgical, dental or veterinary purposes (Chapter 90); or

   (e) electrically heated furniture of Chapter 94.

2. Headings 85.01 to 85.04 do not apply to goods described in heading 85.11, 85.12, 85.40, 85.41 or 85.42.

   However, metal tank mercury arc rectifiers remain classified in heading 85.04.

3. Heading 85.09 covers only the following electro-mechanical machines of the kind commonly used for domestic purposes:

   (a) floor polishers, food grinders and mixers, and fruit or vegetable juice extractors, of any mass;

   (b) other machines provided the mass of such machines does not exceed 20 kg.

   The heading does not, however, apply to fans or ventilating or recycling hoods incorporating a fan, whether or not fitted with filters (heading 84.14), centrifugal clothes-dryers (heading 84.21), dish washing machines (heading 84.22), household washing machines (heading 84.50), roller or other ironing machines (heading 84.20 or 84.51), sewing machines (heading 84.52), electric scissors (heading 84.67) or to electrothermal appliances (heading 85.16).

4. For the purposes of heading 85.23:

   (a) "Solid-state non-volatile storage devices" (for example, "flash memory cards" or "flash electronic storage cards") are storage devices with a connecting socket, comprising in the same housing one or more flash memories (for example, "FLASH E²PROM") in the form of integrated circuits mounted on a printed circuit board. They may include a controller in the form of an integrated circuit and discrete passive components, such as capacitors and resistors;

   (b) the term "smart cards" means cards which have embedded in them one or more electronic integrated circuits (a microprocessor, random access memory (RAM) or read-only memory (ROM) in the form of chips. These cards may contain contacts, a magnetic stripe or an embedded antenna but do not contain any other active or passive circuit elements.

5. For the purposes of heading 85.34 "printed circuits" are circuits obtained by forming on an insulating base, by any printing process (for example, embossing, plating-up, etching) or by the "film circuit" technique, conductor elements, contacts or other printed components (for example, inductances, resistors, capacitors) alone or interconnected according to a pre-established pattern, except elements which can produce, rectify, modulate or amplify an electrical signal (for example, semiconductor elements).
   The expression "printed circuits" does not cover circuits combined with elements other than those obtained during the printing process, nor does it cover individual, discrete resistors, capacitors or inductances. Printed circuits may, however, be fitted with non-printed connecting elements. Thin- or thick-film circuits comprising passive and active elements obtained during the same technological process are to be classified in heading 85.42.

6. For the purpose of heading 85.36, "connectors for optical fibres, optical fibre bundles or cables" means connectors that simply mechanically align optical fibres end to end in a digital line system. They perform no other function, such as the amplification, regeneration or modification of a signal.

7. Heading 85.37 does not include cordless infrared devices for the remote control of television receivers or other electrical equipment (heading 85.43).

8. For the purposes of headings 85.41 and 85.42:

   (a) "Diodes, transistors and similar semiconductor devices" are semiconductor devices the operation of which depends on variations in resistivity on the application of an electric field;

   (b) "Electronic integrated circuits" are:

      (i) monolithic integrated circuits in which the circuit elements (diodes, transistors, resistors, capacitors, inductances, etc.) are created in the mass (essentially) and on the surface of a semiconductor or compound semiconductor material (for example, doped silicon, gallium arsenide, silicon germanium, indium phosphide) and are inseparably associated;

(ii) hybrid intergrated circuits in which passive elements (resistors, capacitors, inductances, etc.), obtained by thin- or thick-film technology, and active elements (diodes, transistors, monolithic integrated circuits, etc.), obtained by semiconductor technology, are combined to all intents and purposes indivisibly, by interconnections or interconnecting cables, on a single insulating substrate (glass, ceramic, etc.). These circuits may also include discrete components;

(iii) multichip integrated circuits consisting of two or more interconnected monolithic integrated circuits combined to all intents and purposes indivisibly, whether or not on one or more insulating substrates, wi h or without leadframes, but with no other active or passive circuit elements.

. For the classification of the articles defined in this Note, headings 85.41 and 85.42 shall take precedence over any other heading in this Schedule, except in the case of heading 85.23, which might cover them by reference to, in particular, their func ion.

9. For the purposes of heading 85.48, "spent primary cells, spent primary batteries and spent electric accumulators" are those which are neither usuable as such because of breakage, cutting-up, wear or other reasons, not capable of being recharged.

SUBHEADING NOTES:

1. Subheading 8527.12 covers only cassete-players with built-in amplifiers, without built-in loudspeaker, capable of operating without an external source of electric power and the dimensions of which do not exceed 170 mm x 100 mm x 45 mm.

ADDITIONAL NOTES:

1. For the purposes of this Chapter the expression "recorded books as defined in Additional Note 1 to Chapter 85" means the oral narration of the text of printed publications, recorded onto gramophone records, magnetic tapes, compact discs or similar mesia without any added commentary.

NOTES:

1. This Section does not cover articles of heading 95.03 or 95.08, or bobsleighs, toboggans or the like of heading 95.06.

2. The expressions "parts" and "parts and accessories" do not apply to the following articles, whether or not they are identifiable as for the goods of this Section:

   (a) Joints, washers or the like of any material (classified according to their constituent material or in heading 84.84) or other articles of vulcanised rubber (excluding hard rubber) (heading 40.16);

   (b) parts of general use, as defined in Note 2 to Section XV, of base metal (Section XV), or similar goods of plastics (Chapter 39);

   (c) articles of Chapter 82 (tools);

   (d) articles of heading 83.06;

   (e) machines and apparatus of headings 84.01 to 84.79, or parts thereof; articles of heading 84.81 or 84.82 or, provided they constitute integral parts of engines or motors, articles of heading 84.83;

VEHICLES (EXCLUDING RAILWAY OR TRAMWAY ROLLING-STOCK), AND PARTS AND ACCESSORIES THEREOF

NOTES:

1. This Chapter does not cover railway or tramway rolling-stock designed solely for running on rails.

.

2. For the purposes of this Chapter, "tractors" means vehicles constructed essentially for hauling or pushing another vehicle, appliance or load, whether or not they contain subsidiary provision for the transport, in connection with the main use of the tractor, of tools, seeds, fertilisers or other goods.
Machines and working tools designed for fitting to tractors of heading 87.01 as interchangeable equipment remain classified in their respective headings even if presented with the tractor, and whether or not mounted on it.
3. Motor chassis fitted with cabs fall in headings 87.02 to 87.04, and not in heading 87.06.

4. Heading 87.12 includes all children's bicycles. Other children's cycles fall in heading 95.03.

CHAPTER: 90

OPTICAL, PHOTOGRAPHIC, CINEMATOGRAPHIC, MEASURING, CHECKING, PRECISION, MEDICAL OR SURGICAL INSTRUMENTS AND APPARATUS; PARTS AND ACCESSORIES THEREOF

NOTES:

1. This Chapter does not cover the following:

   (a) ar icles of a kind used in machines, appliances or for other technical uses, of vulcanised rubber (excluding hard rubber) (heading 40.16), of leather or of composition leather (heading 42.05) or of textile material (heading 59.11);

   (b) supporting belts or other support articles of textile material, whose intended effect on the organ to be suppported or held derives solely from their elasticity (for example, maternity belts, thoracic support bandages, abdominal support bandages, supports for joints or muscles) (Section XI);

   (c) refractory goods of heading 69.03; ceramic wares for laboratory, chemical or other technical uses, of heading 69.09;

   (d) glass mirrors, not optically worked, of heading 70.09, or mirrors of base metal or of precious metal, not being optical elements (heading 83.06 or Chapter 71);

   (e) goods of heading 70.07, 70.08, 70.11, 70.14, 70.15 or 70.17;

   (f) parts of general use, as defined in Note 2 of Section XV, of base metal (Section XV) or similar goods of plastics (Chapter 39);

   (g) pumps incorporating measuring devices, of heading 84.13; masspiece-operated counting or checking machinery, or separately presented masspieces for balances (heading 84 23); lifting or handling machinery (headings 84.25 to 84.28); paper or paperboard cutting machines of all kinds (heading 84.41); fittings for adjusting work or tools on machine-tools, of heading 84.66, including fittings with optical devices for reading the scale (for example, "optical" dividing heads) but not hose which are in themselves essentially optical instruments (for example, alignment telescopes); calculating machines (heading 84.70); valves or other applicances of heading 84.81; machines and apparatus (including apparatus for the projection or drawing of circuit patterns on sensitised semiconductor materials) of heading 84.86;

   (h) searchlights or spotlights of a kind used for cycles or motor vehicles (heading 85.12); portable electric lamps of heading 85.13; cinematographic sound recording, reproducing or re-recording apparatus (heading 85.19); sound-heads (heading 85.22); television cameras, digital cameras and video camera recorders (heading 85.25); radar apparatus, radio navigational aid apparatus or radio remote control apparatus (heading 85.26); connectors for optical fibres, optical fibre bundles or cables (heading 85.36); numerical control apparatus of heading 85.37; sealed beam lamp units of heading 85.39; optical fibre cables of heading 85.44;

   (ij) searchlights or spotlights of heading 94.05;

   (k) ar icles of Chapter 95;

   (l) capacity measures, which are to be classified according to their constituent material; or

   (m) spools, reels or similar supports (which are to be classified according to their constituent material, for example, in heading 39.23 or Section XV).

2. Subject to Note 1 above, parts and accessories for machines, apparatus, instruments or articles of this Chapter are to be classified according to the following rules:

   (a) parts and accessories which are goods included in any of the headings of this Chapter or of Chapter 84, 85 or 91 (excluding heading 84.87, 85.48 or 90.33) are in all cases to be classified in their respective headings;

   (b) other parts and accessories, if suitable for use solely or principally with a particular kind of machine, instrument or apparatus or with a number of machines, instruments or apparatus of the same heading (including a machine, instrument or apparatus of heading 90.10, 90.13 or 90.31) are to be classified with the machines, instruments or apparatus of that kind;

   (c) all other parts and accessories are to be classified in heading 90.33.

3. The provisions of Notes 3 and 4 to Section XVI apply also to this Chapter.

4. Heading 90.05 does not apply to telescopic sights for fitting to arms, periscopic telescopes for fitting to submarines or tanks, or the telescopes for machines, appliances, instruments or apparatus of this Chapter or Section XVI; such telescopic sights and telescopes are to be classified in heading 90.13.

5. Measuring or checking optical instruments, appliances or machines which, but for this Note, could be classified both in heading 90.13 and in heading 90.31 are to be classified in heading 90.31.

6. For the purposes of heading 90.21, the expression "orthopaedic appliances" means appliances for:

   - preventing or correcting bodily deformities; or

   - supporting or holding parts of the body following an illness, operation or injury.

Orthopaedic appliances include footwear and special insoles designed to correct orthopaedic conditions, provided they are either (1) made to measure or (2) mass-produced, presented singly and not in pairs and designed to fit either foot equally.

7. Heading 90.32 applies only to:

(a) instruments and apparatus for automatically controlling the flow, level, pressure or other variables of liquids or gases, or for automatically controlling temperature, whether or not their operation depends on an electrical phenomenon which varies according to the factor to be automatically controlled, which are designed to bring this factor to, and maintain it at, a desired value, stabilised against disturbances, by constantly or periodically measuring its actual value; and

(b) automatic regulators of electrical quantities, and instruments or apparatus for automatically controlling non-electrical quantities the operation of which depends on an electrical phenomenon varying according to the factor to be controlled, which are designed to bring this factor to, and maintain it at, a desired value, stabilised against disturbances, by constantly or periodically measuring its actual value.

CHAPTER: 91

CLOCKS AND WATCHES AND PARTS THEREOF

NOTES:

1. This Chapter does not cover:

   (a) clock or watch glasses or weights (classified according to their constituent material);

   (b) watch chains (heading 71.13 or 71.17, as the case may be);

   (c) parts of general use defined in Note 2 to Section XV, of base metal (Section XV), or similar goods of plastics (Chapter 39) or of precious metal or metal clad with precious metal (generally heading 71.15); clock or watch springs are, however, to be classified as clock or watch parts (heading 91.14);

   (d) bearing balls (heading 73.26 or 84.82, as the case may be);

   (e) ar icles of heading 84.12 constructed to work without an escapement;

   (f) ball bearings (heading 84.82); or

   (g) ar icles of Chapter 85, not yet assembled together or with other components into watch or clock movements or into articles suitable for use solely or principally as parts of such movements (Chapter 85).

2. Heading 91.01 covers only watches with case wholly of precious metal or of metal clad with precious metal, or of the same materials combined with natural or cultured pearls, or precious or semi-precious stones (natural, synthetic or reconstructed) of headings 71.01 to 71.04. Watches with case of base metal inlaid with precious metal fall in heading 91.02.

3. For the purposes of this Chapter, the expression "watch movements" means devices regulated by a balance-wheel and hairspring, quartz crystal or any other system capable of determining intervals of time, with a display or a system to which a mechanical display can be incorporated. Such watch movements shall not exceed 12 mm in thickness and 50 mm in width, length or diameter.

4. Except as provided in Note 1, movements and other parts suitable for use both in clocks or watches and in other articles (for example, precision instruments) are to be classified in this Chapter.

1. Motor vehicle manufacturers importing original equipment components provided for in this Chapter must be approved by the International Trade Administration Commission.

2. Automotive components described in any other Chapter of Schedule No. 1 shall, if imported by a motor vehicle manufacturer approved by the International Trade Administration Commission for the assembly or manufacture of motor vehicles specified in this Chapter, be deemed to be original equipment components classifiable in this Chapter.

3. Original equipment components under the provisions of this Chapter shall include all automotive components as defined in Note 8 for incorporation in motor vehicles specified in this Chapter, but shall not include consumables or materials if not cut to size or shape or made up suitable for such use.

4. .

   (a) "Consumables" mean those goods which are used in the manufacture of motor vehicles and components therefor, but do not form part of such motor vehicles or components.

   (b) Any reference in this Chapter to a tariff heading comprising two digits followed by a point and two noughts (for example 01.00) shall, for the purposes of Note 5 to this Part, be construed as referring to all tariff headings in Part 1 of this Schedule the first two digits of which correspond to the two digits referred to in this Part.

5. Original equipment components for motor vehicles enumerated under heading 98.01 shall not include automotive components of which:

   (i) the floor panels, body sides or roof panels are permanently attached to each other (except in the case of cabs for road tractors for semi-trailers of a vehicle mass exceeding 1 600 kg, for motor vehicles for the transport of goods of a vehicle mass exceeding 2 000 kg and a G.V.M. exceeding 3 500 kg and for chassis fitted with cabs of a mass exceeding 1 600 kg and a G.V.M. exceeding 3 500 kg in which case he cabs may be assembled and trimmed);

   (ii) the engine and transmission assemblies, axles, radiators, suspension components, steering mechanisms, braking or electrical equipment or instrumentation are fitted to such floor pans or chassis frames; and

   (iii) the bodies/cabs are fitted to floor pans or chassis frames (except in the case of vehicles or of a mono-built construction of a vehicle mass exceeding 2 000 kg).

6. The expression "vehicle mass" shall be taken not to include the mass of any fuel or water but to include the mass of any lubricants, spare wheel and tools which are supplied as standard equipment.

7. The expression "mono-built" shall be taken to mean a vehicle:

   (i) without a chassis frame in which the body itself supports the engine, transmission and axles; or

   (ii) of unitary body construction, with or without certain elements of the chassis incorporated in the body.

8. For the pruposes of this Chapter "automotive components" means a new article which can be identified as being suitable for use in the manufacture of motor vehicles manufactured under rebate items 317.04 and 317.07 or original equipment components, including carpet cut to floorpan shape, leather seat covers cut to size, unfinished articles, including blanks and rouch castings, having the essential character of automotive components.
